## *Obstacles on a way to an awareness of personality Immortality*

15.16855. According to scientist researches, it had been taken about three million years of the "human" development history for first glimpses of the animal mind to turn into first signs of a "human" Self-Consciousness. Then about thirty thousand years, we have learned the art of hunting and gathering everything that nature had given, for the next three thousand years we were forced to become farmers and small tradesmen, for the last three hundred years there was a sharp jump in our development and we reached the pinnacle of our current Civilization - and in the oncoming thirty years we will come to the mass development of a Cosmic Self-Consciousness ... Such, my dear, an interesting tendency to an acceleration of the "human" Forms of Self-Consciousness development showed up: three millions, thirty thousands, three thousands, three hundred and thirty years ... Very, very steep hyperbole appears in an unprejudiced Imagination!

15.16856. Compared to the beginning of this millennium, incoming flows of a high level Energy-Information and thereby arising need for its processing by Formo-Creators of Self-Consciousness for the majority of the Earth population has grown in tens of times, and for many of the intellectually developed "people" – in hundreds of times. As a rule, this Energy-Information is in a greater degree of intellectual than of sensual characteristic– specific technical, scientific, educational, general cognitive, philosophical, etc. It means that HYV-BBY-Configurations of «now» focused by you Stereo-Types also radically changed in more qualitative side, in accordance with an urgent – I would even say – vitally important – necessity of continuous perception and deep mastering of these energy-information Flows by Form-Creators of Self-Consciousness of modern «people». The fact of manifestation in Collective Consciousness of «humanity» of Universal Knowledge of «IISSIIDIOLOGY» also confirms it – so high-frequency and cardinally new Energy-Information simply could not introduce in a FUA-DRF-dynamics of Forms of Self-Consciousness of these groups of «human Continuums», if structures of Self-Consciousness of at least 150-200 million «people» would not have a reliable mechanism for its «Decompressing» and authentication with the already synthesized previously Conceptions.

15.16857. By getting at the expense of countless overfocusings the ability and possibility to perceive and logically process such a high intensity of energy-informatic Flow, you already will not be able to lose it, because its frequency will rise rapidly, simply forcing you to become an active part of more and more intensive dynamics. You have no reason to worry - billions of unconscious by you "Deaths" of less qualitative "personality" Interpretations of your Stereo-Form, which are not ready for such intense intellectual-physical rhythm of Existence, will provide you with all necessary Experience, and also with proper mental, sensitive and intuitive abilities. As for the newest Knowledge, Energy-Information that is used by you, the quality of formed by you Stereo-Forms also will rise rapidly. As soon as you, by mastering this Information, will begin all deeper to understand Universal Paradigms of the University, which provide every manifested Form with "personality" Immortality, your Conceptions of "Death" and mechanisms of the manifestation of all objects of surrounding Reality will radically modify in your Self-Consciousness, until they will not quite disappear from culture and social structure of a new human - Iluuvvumic society.

15.16858. Speaking that the speed of rise of energy-informative Flows' quality which pass through the structures of your Self-Consciousness increases in geometrical progression, I want to emphasize that now it becomes absolutely impermissible to cover one's own ignorance or follow in Life by those, through even very kind and good but nevertheless already insufficiently perfect and constructive knowledge which has sink into oblivion of "former", less qualitative Form-systems of the Worlds, knowledge which was useful and appropriate only five-ten years ago, and now present of themselves serious obstacle on the way of such deepening and expansion of the whole system of Collective Consciousness of the modern "humanity", which we need to be more consistent with high spiritual, moral, philosophical, scientific, political and cultural demands of New Worlds - 4-5 Dimensional (!) - Continuums, which so unexpectedly stretched out their boundless Space Expanses in front of our high spiritual Aspirations.

15.16859. But to master these mysterious and so far very incomprehensible for us Expanses of Living Space Intellect, it is necessary to fulfill one essential condition: one or even few fruitful Lives are not enough— all of us need to begin understand consciously and creatively own the real, true, absolutely functional «personality» Immortality, fruitful life is too little - we all need to begin to understand consciously and creatively to own a real, real, totally functional "personal" Immortality, what will enable to embody such grandiose plans and far going projects resolutely, which you and I are faced with to begin and to reduce to planned completion together. And as it usually happens in Life, this, it would seem unrealizable, but vital condition of our possible, more fruitful, Existence only had to appear for the easiest and universal solution immediately was presented for the Earth population on the part of the University by way of just appeared Knowledge of IISSIDIOLGY: you always were and are absolutely Immortal, you just did not know about it before, or rather, absolutely forgot, given yourself in the power of СФУУРРММ-Forms of imperfect Creators of АРГЛЛААМУНИ and ИНГЛИМИЛИССА-ИИССИИДИ, which keep all of us up to present time on a short and hard leash of unrealized passions, false ambitions and excessively ambitious desires.

15.17860. And it now turned out that to achieve a state of 'personal' Immortality neither magic elixirs, nor grandiose physical, intellectual and financial costs are need - it is only need in a most careful way to cultivate in one's own Self-Consciousness the highest Conceptions of Who You Are indeed, and in a real Choices in every instant of your Life by all your spiritual and physical efforts try to confirm this СФУУРРММ-Forms with not only kind and beautiful words but also with useful for everyone deeds.

*QUESTION. Here I read that I am immortal. Strong inner desire to develop, to seek to something good arise in me. Surrounding Reality stopped suit me, and I start thinking about how to “skip over” to where I am better. If I am immortal than can I overfocus in Forms of Self-Consciousness of more qualitative Form-systems of the Worlds purposely provoking some negative situations - a suicide, for example? Will it help for Form-Creators of my Self-Consciousness immediately to overfocus in a more qualitative “development scenarios”, where there is much more benefit from my Life both to me and to society?*

15.16861. No, dear Kraullarrd, it will not turn out, because an initial motivation of every suicide state is already a manifestation of extremely selfishness: “person” want’s to commit suicide either because he dislike this, yes, so far not very qualitative – in relation to some of estimated by him possible variants – World, and he simply wants to be in more qualitative, where, as he supposes, it will be much better for him, or because he already extremely fed up with constant encountering with displays of his own imperfection, with that he absolutely can’t stand out against a background of someone’s universally recognized exclusiveness, endowments, dexterity, intelligence, adaptability, perfection and similar abilities among surrounding people. In every case obtrusive desire to suicide is preceded by some long depression conditioned by a powerful “Decompressing” FUA- Dynamics of low-frequency Form-Creators of Self-Consciousness, who give to all this “overfocusing” process very tough and uncompromising egocentric tendencies, thereby persistently orienting the “personality” on a stable immersion in a egoistic FUA-Dynamics of HYY-BBY-Configurations of some of protoform Directions. None of suicide Motivations simply on principle can not help you at the moment of realization of this desire to focus on more positive dynamic of Self-Consciousness of those of your “personal” Interpretations, who are manifested in an already more qualitative Levels of possible “scenarios” of your “Rotational” Cycle, because the same unsyntised dynamics – selfishness will be in a basis of all your actions and thoughts.

15.16862. Some of those who have not troubled themselves by profound study of iissiidiology Knowledge while just superficially flipped through what was the most accessible to their understanding, can accept as a Motivations CΦYYPMM-Forms that any of your countless “Deaths” is a result of inertial implementation in a Self-Consciousness of some intermediate phase of inter-quality Synthesis, and, thanks to a newfound Experience, serves as a basis for continuous qualitative increasing of FUA-dynamics of Self-Consciousness of each of the subsequent focused by you “personality” Interpretations. Here can be simple misunderstanding that the process of evolutionary development particularly in lluuvvumic Direction is already (through capabilities of more high quality of decisions made by you) an integral of more primitive syntetic FPV-dynamic of Form-Creators of Self-Consciousness, who structurise all endless amount of protoform development Directions.

15.16863. Thus by committing suicide in amount of “scenarios”, you after every from your subjective “Deaths” more and more deeply get into “under-uspect” and ‘among-aspect” Synthes’s processes in schems, which were in more degree suitable not for persons but for Form-Creators of Self-Consciousness of some of Proto-Fromms. It can take lots of years of your Life for unsonsciousness for you overfocusing in those strongly incompletely-synthesized HYY-BBY-Configarations. While those of your “personalities”, which managed their depressive states by finding more altruistic Motivations, have already overfocused in much more qualitative and favorable “scenarios” of the lluuvvumic Direction and already even do not remember that they could have had other, less qualitative decisions, which have preferred the chosen by you “personality”, who have committed suicide.

15.16864. Exactly all your multiyear Experience of "hardships" and infinite overcoming of different obstacles, failures, troubles, unfulfilled hopes and other unfavorable life circumstances, which abundantly structure "scenarios" of all protoform Directions, being instantly "projected" into a more qualitative "areas" of common slloogrentnost of HYV-BBY-Configuration of your Stereo-Form, allowed high-frequency Formo-Creators of Self-Consciousness of your other "personalities" to reject all possible variants of suicidal decisions and further to concentrate on finding other ways out of the situation. It turns out that you have been pining, suffering and tormenting yourself for many years only because in some of "tensor" moments of your life from all possible for you decisions, you have preferred to choose the most not qualitative variant. Think about it.

15.16865. I had the opportunity repeatedly to observe and to compare how completely differently continued a Fate of "people" in different-quality "scenarios" for those variants of their "personalities", who have chosen to commit a suicide, and for those ones, who, already enjoying their integral Experience, were able to take completely other decisions. The huge difference in a quality of "turns", occurring in the future versions of their Lives, is simply amazing! In a life circumstances of a suicide for many days, months or even years dominates the most disappointing destructive dynamics of destruction, tragedy, failure, drama, a relationship with the nearest "people" inevitably begin to spoil, a business deteriorates rapidly, families break up, a creativity runs out, bright and inevitably the worst degradation trends appears – the tendency to alcoholism, drug abuse, sadism, serious psychiatric disorders, what provokes again and again in the Self-Consciousness even more severe suicidal states, which "personality" is simply not able to overcome any more and rapidly is "going downhill."

15.16866. In contrast to this terrible and depressing picture, the Fate of those who have absorbed all this Experience and by investing a large share of common sense when making important decisions, did managed to cope with the temptation to "solve the problem in one fell swoop," continues in the entirely opposite way: difficult life situation either soon "dissolves" by itself or, after applying stable positive motivations to it, consistently and radically changes, revealing a variety of new creative prospects variants not only in the "personal" Life and in the family, but also in work, in tuition, in health and in spiritual self-improvement. Subjectively, this is perceived as "the beginning of brightness in the Life." And the thing is - only the additional life Experience, which, as the miners in the mine, "are mining" for you by backbreaking very hard work and in the one summed moment of the decisive choice "re-project" in your Self-Consciousness these of your "personal" Interpretations, which themselves did not managed to make this choice. So decide at last, - "now" and not then, when it will be already too late! – with which of these variants of your different-quality "personalities" are you most willing to self-identify! Take this example as one of your current Motivations that are helping you always to find ways out and do not lose Hope for the best, even in the most seemingly "inconsolable" and "hopeless" circumstances of your Life.

15.16867. People say: change yourself and you will change the World around. You should not take this too literally, naively believing that a "man", bringing some of his vibrations into this World, thus alters it. Because actually it is simply impossible to make this or any other World at least a little bit better, – absolutely Everything in the Universe EXISTS initially and neither to change by at least one "quant" of its inherent Energy-Information, nor to disappear somewhere simply cannot, wont be able. This is exactly the same as you cannot change by any of your manipulations an initially existing "scenario" of any focused by you Worlds. Neither Worlds, nor realities and, especially, "Continuums" structurally do not change at all!

15.16868. Instead, quality characteristics of FPV-FDO-dynamics of Formo-Creators of your Self-Consciousness are continuously changing! By changing at least something in yourself at the Levels of Thoughts, Feelings and Actions, you are making corresponding changes in a frequency and in a Configuration of Energy-Information interactions of "Fields-Consciousness" (СФУУРММ-Forms), with which Formo-Creators manipulate rezonationally, what at once re-project them (and "you"!) in a HYU-BBY-Configuration, which strictly corresponds to just accomplished in the Self-Consciousness qualitative changes. And this HYU-BBY-Configuration initially structures a Space-Time "geometry" of some World of the whole, nearest in terms of quality of Synthesis, duvuyllerrt group of Worlds Formo-systems, part of which "you" – along with all the Formo-Creators of your Self-Consciousness – are becoming just for one moment.

15.16869. Whether the focused by "you" Worlds will be better or worse than the one, which "you" would like to "leave", depends on you, on the quality of your psychical states. Everything is indeed the case: you do not change the World - you only constantly transform the HYU-BBY-Configurations of "yourselves", by improving your Representations of reality around and of "yourself." By changing for the better, "you" are automatically re-focusing into more qualitative Worlds Formo-systems and into structured by them types of subjective Realities. Why, tell me, do you need a suicide, why do you need a deliberate "Death", when all the necessary changes in your life are anyway in your power?! The desire of a "Death" – it is always a sign of a strong realization in the information Self-Consciousness "space" of СФУУРММ-Forms of СВУУЛЛ-ББВ-Conglomerates of the lowest Levels of the two lower ИИССИИДИ-Centers, simulating their inherent conditions of manifestation: the state of despair, hopelessness, irritability, resentment, hatred, desire of self-destruction to the realization Form.

15.16870. It is not the secret that a lot of "people" round us stay in critical for mentality conditions for a long time, being patients who are seriously ill, who are confined to bed, to wheelchair, who are, at times, deprived of the body parts, deprived of the most necessary things in point of both mental state and of conditions of life, forced to be contingent on others entirely or partially, who constantly feel themselves affronted morally and physically. Therefore sometimes (what must be confessed!) they have Thoughts to forfeit such Life, naively setting hopes upon the best fate in some, completely unknown to anyone, "posthumous" existence, – they think, it can't be worse anyway! And that is how it all begins. And you will ask what "all"? Yes, steady unconscious refocusing of Formo-Creators of Self-Consciousness at first in less and less qualitative HYU-BBY-Configurations of some of "protoformnyh" Directions, structured by "scenarios" which are the most unfavourable for human development (that is to a limit saturated with serious illnesses and uglinesses, mental and moral sufferings, pettiness and weak-mindedness), and then – rezonatsionnye "reprojections" into Proto-Forms themselves as well, with all consequences resulting from this. As the saying goes: "There was a person - and there is no a person!"

15.16871. In this whole process there are its own nuances. Let's admit, some of you, having read «ИССИДИОLOGY» superficially and hastily, in a state of deep depression (though such and similar to them states are impossible at all for those ones, who study this Knowledge seriously!), will try to outwit oneself: "I will be geared up for a better image of myself and will finish with some "pleasant" suicide this "scenario", which is not quite what I want, - I will swallow sleeping pills or drugs, or instant-acting poison..." Thinking that in pleasant states there will be refocusing to more favorable "scenarios" as well. Well, what can I answer to this? All this is "rubbish" and the absolute "ИССИДИОLOGY" profanation! Carefully camouflaged in Self-Consciousness Creative

Activity of Formo-Creators of unsynthesized low-frequency Levels will change absolutely nothing in an impulsive Cause of your decision itself - active realisation of Synthesis processes of СФУУР-ММ-Forms of the deepest egoism, not capable to an intensive activity of intensive psychointellectual and spiritual self-improvement, to a consistently-conscious projection and a patient embodiment in outer reality of more and more qualitative, beautiful and I would even say - majestic-grandiose Conceptions of Oneself and of One's own greatest transforming role in a dynamics of the Macrocosm.

15.16872. Certainly, any refocusingings to more high-quality "development scenarios" will not turn out in any of suicide cases (whatever with what farfetched-positive or supposedly altruistic Motivations such a decision would be covered with), because in a Self-Consciousness of a "personality", who can actually implement such intent, there is insufficiently active Creative Activity of Formo-Creators of the next two ИИССИИДИ-Centers, which stimulate stable manifestation of powerful СФУУРММ-Forms of positivism, Altruism, high-spiritual Aspiration in information "space", which are essential for formation of a necessary "резонансионный эффект" with the most active Self-Consciousness Levels of more qualitative НУУ-ВВУ-Configurations.

15.16873. Undoubtedly, I excellently understand many from these unfortunate, often rather educated and humane "people", at the same time aspiring to their's own self-improvement and not seeing any sense in the further "miserable" existence without possibility of normal creative realisation in the interesting to them Direction of development, that, actually, provokes those constant nervous tension, irritable-embittered states or depressions, in which they stay. But, nevertheless, I cannot deceive them into believing that there is at least the smallest hope of possibility of an favorable for their existence outcome of any suicide: the attitude to consciously committed "Death" act itself is always motivated by the egoistic attitude to it, that is by the aspiration to make use of the mechanism of "posthumous" refocusingings as of the tool for one's own qualitative states improvement. But the fact is that the mechanism of qualitative Self-Consciousness improvement – is absolutely other! The problem lies in the fact, that in very hard, stressful life circumstances "people's" desire are, as a rule, aggressive and extremely focused on a self-survival at any cost, therefore it is simply impossible to carry out the process of the conscious positive refocusing being in negative states ...

15.16874. When in the beginning of my spiritual Path I learnt to tune in deep Meditation to frequency of manifestation of various, enough qualitative as it seemed to me at that time, "structures of the Universe", it was very often – with all my positive psychic mood – that I could not be manifested in expected circumstances only because of presence of egoistic aspiration in my Self-Consciousness "to get exactly there". And for a long enough period of time I had to be content with the study of less qualitative "Worlds Formo-system" (and actually that was, undoubtedly, every possible Spheres of Creativity of ОЛЛАКТ-ДРУОТММ-Systems) than those that I was interested in. It was only later on, definitely having decided to devote my Life to the patient and understanding Service to the "people", having started to write books and to investigate other Worlds not "personally" for myself, not to meet my vital interests, but to tell in these books, what occurs in the «Thin World» in details and as it is possible more truthfully, I become firmly established in much more qualitative intentions and by that has strengthen my Self-Consciousness in steady altruistic motivation – "I do it not for myself, but for increase of qualitative dynamics of Self-Consciousness of millions "people"!

15.16875. In this way I have gradually learnt always - both in Meditation, and in the my outer reality - to be the Observer, meticulously and impartially studying Life in its any manifestations, instead of being the "personality", subjectively interested only in some concrete results of the vital creativity.

And only after that it began to come out for me consciously to refocus "there", "where" my "Close Attention Focus" was directed the most. But in the beginning, I repeat, even the slightest desire which could be considered only as a hint of egoism, did not allow me purposefully to refocus - again and again I was manifested in less qualitative circumstances, than those ones to which I was tuned in the Meditation. And It depended not on my desire, but only on a true condition of my Self-Consciousness: If at least the slightest, smartly camouflaged egoism sign was shown during a psychological tuning, all my meditative expectations were in vain.

**15.16876.** As it seems to me, I have enough in detail and deeply touched upon issues of deep Meditation In "IISSIDIOLGY Bases", therefore I will only remind you here, that in Buddhist zazen practice, with which I began, the Meditation purpose is to achieve a state of "wu wei" ("not-mind"), that is clearing of "unpacking" dynamics of "personal" Self-Consciousness from powerfully limiting control of Formo-Creators of low-frequency Levels over this process. It is also possible to achieve "Not-mind" state by means of contemplation of mandalas, repeatedly reading or singing of mantras, prayers, psalms. But I has to warn you, that if do not reorient consciously focus dynamics of Formo-Creators from Spheres of Creativity of СВУУЛЛ-ВВУ-conglomerates in high-frequency Spheres of Creativity of СТОЛЛМИИ-СВУУ- and УОЛДМИИ-СЛИИ-Creators after achievement of this state, then powerful activization of СФУУРММ-Forms of higher Levels of Self-Consciousness will not be reached. Therefore such meditation will be ineffective: at the best thus it is possible to reach only short-term subjective experience, which can be conditionally defined as "joyful emptiness" - relative lack of involvement of low-frequency Levels Formo-Creators in VEN-unpackings. But it is not at all that steady state of an urgent need in manifestations of high Altruism and Service, which arises when even the lowest СФУУРММ-Forms of lluuvvumicheskiy Directions become active in Self-Consciousness, but only the short-term feeling of a neutrality or positivism towards to any manifestations of the outer reality.

**15.16877.** That is I want to tell you, that during deep Meditations on the conscious manifestations in НУУ-ВВУ-Configurations of more qualitative "scenarios" СФУУРММ-Forms it is necessary to try to tune in a way to provide in Formo-Creators' "unpacking" dynamics of the Self-Consciousness a stable state of absolute Altruism, entire Love to Kindness and Goodwill to all Forms of Self-Consciousnesses of World around, in whatever unattractive and deformed Formo-Images they have been presented in front of your subjective Perceptual system. If you are seriously ill, you should try as specific as possible to remember and as deeply and stably as possible to attune to those optimistic, good-natured and kind states which you experienced before the onset of the illness, and which you already thoroughly managed to forget. Because you know that after the illness has begun, injury or something else unpleasant has occurred, your Self-Consciousness has been constantly stimulated only by realization activity of low-frequency Formo-Creators and powerfully suppressed by low quality, selfish СФУУРММ-Forms which they use.

**15.16878.** As a result of this influence the general dynamics of "Creative Activity Focus" of НУУ-ВВУ-Configurations focused by you decreased very much and then it is very difficult for you to recall yourself as sincerely joyful and truly happy. Therefore, even restoring with FPV-FDO-dynamics in your own "individual ODS" children's or youth' memories of joy that once were overfilling you (which are in a greater degree selfish at theirs Core as well), you will not be able to keep from feeling of powerful envy to "yourselves" – former you, young, healthy and joyful, optimistic and happy, and this jealous state of "not positive comparison» will surely leave an imprint of egoism on all dynamics of your Imagination, and hence on all your meditation Aspirations' quality as well.

15.16879. For example, in a suicide case "people", being naively deceived by seeming ease and painlessness of this way, often use soporific. But even in this case also you just will not be able consciously to stabilize your Self-Consciousness in any of the most qualitative for your "individual ODS" states. It may seem to you that everything is so simple and reliable - allegedly, someone can take painkillers and a deadly dose of soporific at the same time, tune to the most pleasant expectations, fall asleep in good mood, "die" and come to oneself already in a group of much more favorable "scenarios", "having slipped past" through the whole set of the most adverse conditions during that time. Then, having faced ones again with certain life difficulties and "unsolvable" problems, someone can repeat this procedure and "find himself" in the most favorable "scenarios" again. Then - again, again and thus - endlessly, trying to experience in Life only the most pleasant moments. No, it is nonsense, which does not happen!

15.16880. Firstly, all bio-creators of your poisoned organism - according to "nonlethal scenarios" of this duvuyllerrtnyy group - will begin to struggle strenuously for a survival of this manifestation Form and will take all measures to reject and to eliminate the poison taken by you: severe vomiting will start, sharp, just terrible stomach pain, very painful spasms will lead to epy body muscles ache, as though turning the body inside out. Under the intensive poison influence, when toxins enter the body, for you it already will be no time to tune and to start representing those positive, happy states which are necessary for refocusing - it turns out, that at the moment of any "Death", that you have voluntary chosen, you, anyway, go into a negative states, which do not allow you to have positive attitude to "yourself", neither to your body, nor to dynamics of the your outer reality.

15.16881. Against the background of the unbearable pain and physical suffering which cause the activity of CΦYYPMM-Forms of fear, horror, despair and self-pity in Self-Consciousness, you will already have no time for things you dreamt about few minutes earlier: you understand, that you will not be able to tune in a proper way anymore, and, therefore, nothing will turn out for you. But also it is already impossible to return everything back - your body has started its own processes unknown and incomprehensible to you. The hopelessness state immediately involuntarily causes self-hatred for making the hasty decision and, at the same time, a state of unrealized aggression to those ones, on whom you subjectively blame for the sufferings caused to you. Such states are very dangerous - they are a reliable way of refocusing to the "development scenarios" of the lowest quality. They cannot simply give anything except powerful strengthening of your sufferings and except a state of even greater despair, fatality, and hopelessness.

15.16882. I give you such a detailed description not only because I want you to understand deeply and to realize definitively that any kind of suicide - it is knowingly false way to solve any problem situations. In many "scenarios" in which my manifestation, as the "IISSIIDIOLOGY" Knowledge source, stops due to the "deadly" refocusing, which have occurred on different reasons on that, there are often fraudsters amongst you, who, perverting this Knowledge in their favor or absolutely wrongly interpreting some of my statements, undertake (certainly, not without self-interest!) to provide allegedly "high-quality posthumous refocusing" for almost all, who are interested in it, including seriously ill, temporarily despaired, depressively intended or just already rather old "people".

15.16883. Therefore I warn you that they are not just deceivers, or those, who "by kindness sincere" wants to alleviate your suffering, they are reputed criminals, shameless cynics and, actually, cruel murderers, mercenarily using ignorance of the "people" who stay in hard mental or physical states, or just are not

able to purposeful self-development. The “IISSIIDIOLOGY” knowledge allows you clearly to understand the fundamental impossibility of deliverance from suffering by means of such destructive methods – this can be accomplished only by stable high-quality refocusing to "scenarios", where the Reasons for such life circumstances occurrence are already initially absent. Any of you ALWAYS has this possibility, it is just necessary to put a deep enough Understanding of a true Essence of the situation and to provide a high-frequency refocusing dynamics by means of necessary Patience in the addition to your stable Desire to change the situation! Then everything will succeed necessarily!

15.16884. Always it is necessary to remember and to understand, that there are absolutely independent "variants" of you whose existence is simultaneous and of equal value : you living in one groups of *duvuyllerrtnye* "Continuums", let's admit, at the age of seventeen years; you living in other groups at the age of thirty years; you living in variants of "scenarios" before an accident and illness, either you successfully recovered or completely rebounded off bereavements. All that – are your potential possibilities in which it is possible consciously to refocus, having applied to this process not only profound “IISSIIDIOLOGY” knowledge, but having invested in it all best psychomental achievements of your Self-Consciousness as well! As much as you like, you can refocus inertially and be manifested in those of your Stereo-Form’s *HYY-BBY-Configurations*, which we concern subjectively to a category "the Memory-of-the-World-of-the-Past". But it also demands a certain psychomental preparation – long, attentive recollection of events occurring once, to analyze yourself and to experience completely, to endure deeply your own vibrations again. However, it is necessary to consider that during imagined "viewing" of some positive events you will also be looking back upon many details, probably very unpleasant for you, which can negatively affect the quality of your mental states during implementation of conscious refocusing.

15.16885. A lot of "people" are ready to make the choices in behalf of even not absolutely qualitative refocusing, but only to continue their Life in a healthy body (though you already know: the more qualitative is *HYY-BBY-Configuration* focused by you, the more favorable are conditions for the formation of the biological health!). There may be a natural question: and who then will be left to realise himself further in this sick body, in this World? I answer: the same “personality” Interpretation will remain, if this "transition" occurs not through the act of natural "Death", but gradually through consecutive modeling in the Conceptions of "oneself" of the *CΦYYPMM-Form* of continuous normalisation and stabilisation of a state of health. I will remind you, that there are also such purposeful refocusing, which are implemented at your intense concentration on this process during the lucid dreaming.

15.17886. In that case, one, less qualitative part of *slloogrentnyy* *BBY-Configurations* of Formo-Creators of your Self-Consciousness, which has not dared at such refocusing, remains further to be focused on the dynamics of the sick body, and other, more qualitative part of Formo-Creators, which have decided by any means to achieve the goal, by means of powerful strong-willed effort consequentially will start more and more “reproject” in the Time Flow and gradually will realize themselves more and more stably in groups of those "scenarios", in which the "personality", thanks to exclusively psychical self-cultivation, has recovered and could become happier. It is necessary not to forget, that each of you always has a possibility to refocus in more qualitative life circumstances, but it is very difficult and very complicated! First of all, it is necessary to raise one’s own Level of the Creative Activity to the high positive attitude to everything. And these high-frequency *CΦYYPMM-Forms* it is very difficult and extremely hard regularly to maintain in one’s own Self-Consciousness, being in a state of pain, of some humiliation, limitation, dependence.

***QUESTION. Recently American psychologists have conducted a research, finding out, what model of behavior influences social life and health of a "human being" most beneficially. They have converged on the model following Christ's Precepts. And nonetheless, a lot of "people" still does not understand all necessity of a work with their negative reactions and their lowest manifestations, considering them a norm and justifying them with every possible reasons. On the other hand, such "people" are fixated on some of their good qualities, for example, on love to their close relatives, to pets, restricting only to this the sphere of their positivism manifestation. How is it possible to help these "people", how to give them necessary motivation for self-cultivation, how to interest them with that unique "IISSIIDIOLOGY" Knowledge? After all, a lot of "people" do not consider at all that it is necessary to aspire to something and to change themselves, though periodically Life sets them such Lessons, to which it is simply impossible not to pay attention. What it is possible to advice on this matter?***

15.16887. - The Self-Consciousness of such "people" is fixated basically on a material aspect of their existence which is inseparably linked to fear of their own "Death", to fear of the unknown "future", to fear for their children and relatives, to worries for the house and the property, for accumulated by the whole generations and "acquired by the breaking labor" wealth etc. And I think that an aspiration to be altruistic for "personal" Immortality state achievement is the strongest motivation for such "people", who afraid to die most of all. I do not know another, stronger motivation, besides the natural tendency of the "personality" to one's own spirituality deepening, to getting even greater opportunities for selfless and unselfish service to the "humankind", to mastering of even more authentic Knowledge of themselves and of the Universe.

15.16888. But the vast majority of today's "people" do not care about all this, or they are related to this only to please the generally accepted morality, think of it like of some kind of game they invented! Those are primitive beliefs of many "people", who are trying as much as possible to flaunt publicly their religious beliefs, carefully and strictly adhering to the accepted rituals, but absolutely not caring about their psychospiritual state stability, always ready zealously and without thinking, frantically and violently to destroy any manifestation of "heresy" and dissent literally with "fire and sword". A lot of such "people" live only for today, for their own vital interests. They do not care about the situation and the state of the rest. Even when they do learn the true interrelated structure of themselves and of the Worlds they live in, they will just realize that they are "mortal" in their current states.

15.16889. At each moment, they doom themselves to this continuous and ubiquitous "Death", first of all, due to their selfish Thoughts, primitive Feelings, limited Conceptions and firm Conviction that once they will "die". From childhood, they firmly grasped that they will "die" necessarily (and parents and grandparents and everybody at all once will "die"), because "people" were born to live and to "die" one day. And nobody even has a concept that each of us lives infinitely! Particularly prominent and natural clear this truth becomes for everybody at those Levels of Existence, where you will be able to consciously choose not only your Forms, but the Worlds to live in as well. The Knowledge of this, indeed, is my main gift to "people", beginning from spiritually aspired once and ending with ordinary "people", average men, who also do not want to "die", but want to stay alive, regardless of how this state is reached. All the details of the Knowledge of our "personal" and absolute immortality minutely are stated by me in fourteen previous "IISSIIDIOLOGY" volumes. Please, just take it, read, learn, apply – both to your and others advantage!

15.16890. A thorough understanding of the "personality" Immortality principles is only possible if you are well and in details informed about the simultaneous Existence of a lot of Interpretations of each of you as of different-quality realization Forms of Self-Consciousness, that realise themselves in their own "present", but being in relation to you either in "the past", or in "the future", simultaneously with you experiencing themselves both in the Worlds of higher dimensions, and in less qualitative Formo-systems. Without possessing this, though very difficult Knowledge to understand, only by hearsay knowing about such a possibility or just superficially having familiarised with the most simple Conceptions, many of the "people" will publicly express their opposition to the very Principle of Immortality: "Am I going to live the whole eternity in this perishable body?! No, that kind of life does not suit me!"

15.17891. Before to start to understand this many-sided issue in details, any "man" himself must see and to make sure that the "personality" Immortality offers endless creative opportunities for individual development in a more qualitative Direction, inexhaustible prospect of gaining more qualitative skills and joining a huge range of Space Creative activities, about which now he has even no idea only because he is "tightly" tied with his Self-Consciousness only to his current Form of manifestation. When this binding will disappear, when the Creative Activity of АРГЛЈААМУНИ- and ИНГЛИМИЛИССА-ИИССИИДИ "karmic Channels" will stop or considerably be weakened in the Self-Consciousness, "man" will automatically realize himself on absolutely other Levels of Self-Consciousness and will understand for what Immortality is need. Although afterwards he will not be thinking about it, because this state will become a usual part of his Existence, as well as the light which surrounds us, as the Sun, which has always been, is and will be.

***QUESTION. Does the Knowledge of one's own "personality" Immortality helps to overcome the fear of the "Death" in any case?***

15.17892. - This is - the complete liberation of all negative СФУУРММ-Forms dictating you the nature of your behavior, caused by these specific, associated with the fear of "Death", sensations, feelings and experiences. Deeply understood the Principles of one's own, real, and not allegorically or symbolically, immortal Existence, first of all you, organizing your life creativity in a new way, start to search for the most promising Goals and start to build far-reaching Plans, without being afraid to get down with the most difficult challenges. Everything, that seemed to you simply unachievable, too grandiose and impracticable earlier, gets real possibilities to be achieved with the knowledge of one's own Immortality. You already do not worry about the fact that you can suddenly "die" without having finishing the main business of your Life or without reaching the highest Goal you are able to imagine. Everything that you do and what you face with acquires a much deeper Sense, Grandness and Magnitude for you, because you start to realize that no matter how far and majestic appearing before you realization Prospects are, you will still be the active participant of their completion, because your Existence is longer than any Prospects. It - is eternal!

***QUESTION. But we have the fear of "Death" at conscious and unconscious levels. You gave us the Knowledge, included in the "ИИССИДИОЛОГИЈА", to work at the conscious level. But no matter how much we may say that there is no "Death", we cannot overcome the unconscious fear by means of that, can we?***

15.16893. - Because you do not have absolute, deep understanding of this complex Process yet - for the present you were able to familiarize just superficially with that Knowledge which should become a basis of all your interpersonal relationships, individual sensual experiences, collective creativity only in the nearest "future". Without understanding of very important details and particulars, not realizing the Meaning of what "ISSIIDIOLGY" is about at the appropriate high-frequency Level, you continue to cling to what you see in front of you in the mirror – to a "personality", that is completely "separated" and dissociated in your Perceptual system with billions of other your similar "personality" Interpretations, each of which is no less real for you than this one, even though you cannot understand it without opening and activating in your Self-Consciousness of the adaptation mechanism of rezonatsionnyy "attunement" to the HYV-BBY-Configuration of any of "personality" Interpretation of your Stereo-Forma. Having got rid of the negative influence of CBYUJJI-BBY-conglomerates, you gradually will start to realise yourselves not singularly, but throughout the infinite multiplicity of your simultaneous "personal" Existence in all "scenarios" structuring each of "rotational Cycles" of your Stereo-Form. More and deeper making active high-frequency Levels of your "collective Sub-Consciousness", you will be able much more holistically to perceive yourself in all, nowadays incomprehensible for you, variety of simultaneously manifested HYV-BBY-Forms.

15.16894. You do not really worry now that every minute of your Life a huge number of old or deformed cells of your body "die" (simply peel off) and per day you lose billions of your own parts! It does not disturb you at all, as you are absolutely assured that you get the new ones immediately instead of these lost cells. When you will know "ISSIIDIOLGY" deeply, you will understand a very simple thing: each of your "personality" Interpretations, allegedly "dying" for others, actually is "reprojecting" by means of its best part (all life experience) to slloogrentnyy Configuration of your Self-Consciousness – to you, always living and never suspecting about countless "Deaths", through which pass, continuously replacing each other in less qualitative "scenarios", other variants of "you", thereby providing to your Self-Consciousness constant "personal" manifestation in more and more qualitative "scenarios". Herewith absolutely NOBODY suffers and never "dies", as each of supposedly "dead you" represents a part of your own Self-Consciousness - you always living.

15.17895. When the newest "ISSIIDIOLGY" CΦYYPMM-Forms will completely displace from your Self-Consciousness previous limited and triggering an alarm Conceptions of "Death," as of some "end" of Life, you will not have any fear of your "future" any more, whatever menacing forms it take towards you. Having deeply known the Essence of what is happening to you and around you, you will know better the more qualitative Truth, that will make you free not only from the fear of the "Death", but also from the fear of any troubles, difficulties, conflicts, which are only necessary attributes of the invented by you game called "Life", - this Eternal, infinite, with which you do not get tired of and in fact do not stopping for a moment "Your individual life!"

***QUESTION. Whether a stable and steady "Close Attention Focus" shift to more altruistic Self-Consciousness Levels is the only one mechanism to overcome the unconscious fear of the "Death"?***

15.16896. Yes! While energy-information interrelations between Formo-Creators of your Self-Consciousness are not synthesized sufficiently by means of high-frequency intuitive (high-sensuous) CΦYYPMM-Forms, for you "ISSIIDIOLGY" learning will be a process of individual - in a greater

degree intellectual - deepening in the synthesis of a more qualitative Energy-Plasma Levels with a view to a logical self-persuasion, principled self-affirmation and ever deeper rezonatsionnyy immersion of Configurations of Formo-Creators of your Self-Consciousness into an universal Configurations of CΦYYPMM-Forms of "personality" Immortality formulated by me and offered to you. During the present period these Conceptions are the most reliable energy-information basis for the beginning of the process of the more true Understanding of the relationship between slloogrentnye structures of Forms of Self-Consciousness of the "humans" and the Principles of the general slloogrentnost of all other Forms of manifestation of the Macrocosm, for the generation of the intimate Knowledge of the processes that are organized both in your body and in the World around, of the place and the meaning of each one of you in the Universe, in the united Cosmic Creation. As a matter of fact, it is the duvuyllerrtnyy (that is consistently gradual) process of the purposeful and conscious "shift" of the FPV-FDO-dynamics of the Formo-Creators from the HYY-BBY-Configuration of your "present" Forms of Self-Consciousness to those countless groups of your Stereo-Types, which do not contain an Information and CΦYYPMM-Forms of a principal possibility of disappearance of anything or anyone from the slloogrentnyy Flow of the Eternal Existence.

**15.16897.** As far as I can feel the states of those HYY-BBY-Interpretations of myself, Formo Creators of Self-Consciousness of which are actively focused "now" in the creative dynamics of more qualitative Worlds Formo-Systems, such Conceptions as "Death" (in your "present" understanding) simply are absent in the "VEN-unpackings," and this means that in the dynamics of CΦYYPMM-Forms of the "individual ODS" (the "memory") of each of Us, manifested in more qualitative "scenarios" of Our "future", only a more qualitative part of our slloogrentnyy Experience reflects, which is being formed (restored, reconstructed) "now" in the Configurations of Formo-Creators of your structures of the Self-Consciousness through the universal Conceptions of the "IISSIIDIOLOGY." "There" all of you are already well and deeply conscious of that the possibilities for certain "interdimensional" refocusings, that are subjectively defined by you as "the death of the individuality" "now", are available in the slloogrentnost of the Space-Time in order that Formo-Creators of each Form of Self-Consciousness (Sub-Consciousness, Supraconsciousness etc.) could rezonatsionno (that is, in strict accordance with the quality of the synthetic dynamics generated by their Configurations) instantly to "reproject" from one less qualitative Form to another, more suitable for the realization of svilgs-sferatsii of interqualitative synthesis by svilgsony (hvasslonami for 3-4-dimension) in an even deeper Levels of HHAACMM of this Form of manifestation of the Collective Intelligence.

**15.16898.** Thats number one. Number two is that thanks to scientific achievements, in a manifestation of which in the "future scenarios" intensive influence of iissiidiological Conceptions on the results of the experiments has played a significant role, in the Self-Consciousnesses of our more qualitative Interpretations already do not exist Conceptions of "old age" or "painful oldness", "infirmities of age", "severe diseases" (as well as of physical and genetic "ugliness", of the states of morons, mongols, cretins, imbeciles, oligophrenic persons etc.), which are, along with the complete uncertainty about the details of the "afterlife" and the horrors of the "eternal sufferings" that are imposed by religions, the major CΦYYPMM-Forms that support your present state of the fear of the inevitably coming "Death."

**15.16899.** All that is absent in more qualitative groups of duvuyllerrtnyy "human Kontinuumy" because high-creative, positive and altruistic attitude towards yourself and towards any manifestations of the surrounding reality do not have primitive egocentrism and pragmatic self-interest so characteristic of you "today", the realization of which is intensified in the Configurations of the Formo-Creators of

your Self-Consciousness by means of not yet synthesized dynamics of CBYVJJI-BBY-conglomerates. Because the critical concentration of rough types of Energy, manifested in the life creative activity as all kinds - both hidden and obvious – of realizations of egoism, pragmatism, consumership, snobbery, criticism and many other forms of negative energy-information interactions, is exactly what is the main cause of all psychophysiological disorders in your body, without mentioning the pathologies, associated with the gene mutation, such as oncology, viral infections, AIDS, which generate your fear and uncertainty in the prospects of your "future" existence.

**15.16900.** Often - and automatically! – the fear arises in you as well in front of uncontrolled or poorly controlled by high-frequency Formo-Creators of your Seld-Consciousness physiological (and in fact - the objective, that is, evolutionary, caused by specific conditions, which are already critical to implement the anti-tensor svilgs-sferatsiya of khvasslony in the incompletely-synthesized HHAAC-CMM Levels!) need for creative realization through the processes of self-knowledge (Synthesis) of some of instinctual experiences of rough-sexual activity, through such forms of sex that thousands of years were strictly prohibited by all religions and social morality, unreservedly were reckoned in the "completely immoral" and even in principle unacceptable (though they were secretly and continuously practiced by those ones, who have prohibited it).

## CHAPTER XXII

### *The Worlds of our “Future”. Perspectives of manifestation of the forthcoming times*

15.17715. IISSIIDIOLOGY Knowledge allows for plausible and detailed cognition of Life and “Death” Mysteries, as well as the Principles of “individual” Immortality, so that everyone, wishing to comprehend it, would begin the cultivation of Energy-Information of the higher Levels of Energy-Plasma within their own Self-Consciousness, sequentially becoming more harmonious and able to re-focus into the higher-qualitative Realities of their eternal Existence. It has already become possible due to an introduction in a Collective Self-Consciousness of the “humankind” and dissemination in the modern society of absolutely new Conceptions of Principles of organization and forming of not only human, but of all other Forms of Self-Consciousness of the World around, and also more profound Understanding of the Essence of multidimensional structure of the Existence. The Knowledge and the religious beliefs, that exist now, have cultivated invariably in Self-Consciousness of all “humans” only ignorant Conceptions of finiteness of physical existence of any “personality” and inevitability of “Death” fact for any living being for tens of thousands of years, asserting in Self-Consciousness of the “humans” instinctive and in no way inconsumable fear of the future death and thereby intensifying in each “personality” egocentric tends to isolation with Everything.

15.17716. The IISSIIDIOLOGY knowledge lead to consecutive and harmonious Unity of each “personality” with the world around on basis of state of an Intellect and an Altruism peculiar to all intelligence Forms of Self-Consciousness, exposing the most thoroughly and deeply analyzing the fundamental Principles, which provide physical existence infinity of any living being. Profound understanding of functioning of a very complicated Cosmic Mechanism, which provides realization of the “personality” Immortality of each “human”, allows us in practice of our own life creativity to receive evidence permanently that to manifest unconditional Love, Kindness, Altruism and positive attitude to Everything is always incommensurably “more advantageous”, than to be obsessed with any egoistic tendencies for long periods.

15.17717. Why, a reward, which you receive automatically due to being in the altruistic state, is so great, that it cannot compare with any material, moral, psychical and physical expenses! It is – the

opportunity to self-improve and to raise the quality of one's own "personal" existence continuously. And the more you will "loose" of what was of indubitable value for you before acting this way consciously, the more self-sacrifice you become able to, the more effective process of your Unity with more and more qualitative and favourable conditions of Existence come to be. But without the iissiidiological Knowledge, which stimulate mighty the developing of high-feeling Intellect and raise the consciousness of each "human" when "individual" life creativity realizes, this natural process is becoming considerably complicated, loses its effectiveness and linger strongly. It is the same as to make those actions blindly, which need great accuracy, attention and concentration, - every your attempt will be followed by countless unconscious and involuntary mistakes, blindly correction of which will cause new mistakes and blunders. And it goes so – infinitely, exactly what we observe in striking terms of the whole History of slightly effective development of the "human societies", which use fake and ignorant Conceptions of "themselves" and of a Nature of the World around for thousands of years.

15.17718. Trying to understand and to apply in one's own Life the iissiidiological – intellectually-altruistic – principles of thinking and feeling, many among you, have been stumbled on numerous difficulties and misunderstanding of people around, firstly will want to give this undertaking up, when they understand that without great psychomental efforts and availability of phenomenal assiduity and patience it is simply impossible to master these principles. But the more they will try to prove to themselves and to others that, as if, "it cannot be", the more they will realize, that in the meantime this Knowledge is really the only one – the most logical and convincing of all available variants – resolution of the issues of the Sense of Existing of every "personality" and of the Universe, and of the principles of development of not only the "humankind", but also of all other Forms of Self-Consciousness.

15.17719. All of us are born not for destruction of each other in persistent wars and conflicts, not for squabbles and quarrels, violence and humiliation, and not only for survival and reproduction of similar to us, but for the development of the strong creative Potential on the basis of Altruism and Intellect, which revive in our Self-Consciousness creative harmony and spiritual Unity with all Existing. If we will not become more altruistic and intellectual, full of love and educated, if we will not finally start to seek to help each other actively, but will continue to live apart and without benefit for all other "humans", then our Self-Consciousness is not able to manifest oneself in the World around by way of Forms, which structure more qualitative Continuums, because our Thoughts and Feelings, our scanty Conceptions of ourselves will continue to enter into a powerful energy-information dissonance with Configurations of these Forms, thanks to which we ourselves continually create around us unfavourable, conflict and destructive circumstances. The conception of that it is possible to live for thousand years without changing qualitatively for the better and without perfecting oneself is absolutely ridiculous by itself, unnatural and absurd.

15.17720. In the Worlds of New Spirituality and New Science, which will have adopted and successfully put into Life the iissiidiological Conceptions of the Universe structure, such gloomy and all-deterrent notion, as "Death", and following this Illusion "dying" process will stop to exist at all as the attributes of life routine just in one-two generations. It will happen not only due to newest science advancement, but also by virtue of that a completely new type of Forms of the highly developed human Self-Consciousness, fully got rid of ignorant "Death" CΦΥΥPMM-Forms and egocentrism, will confidently appear in the sphere of a high-qualitative planetary Creativity – the Creativity of the humans, who are aware of their "personal" Immortality and skillfully make use of it for common good gaining, – during the nearest thirty years.

15.17721. Very soon, when to detailed development and researches of different directions of iissiidiological Knowledge will actively join best minds of our planet and specialists of many fields of science, discoveries in a sphere of quantum research and nanotechnologies will start to manifest in the World around abundant, making our and your Life not only more comfortable, productive and soulfully, but also and much more long, painless, smooth. Very widely “Humankind” will start to use various scientifically technologies, engineered for nanolevels of physiological activity of our organisms. With their help people will get the possibility to start gradually, by getting involved in frontier resopasons of three-four-dimensional physical Worlds deeper and deeper, penetrate with one’s own Self-Consciousness into slloogrent dynamics of Forms of 4-5-dimentional Continuums.

15.17722. Nano- and holographic technologies, basing on iissiidiological Conceptions of rotationness and duvuyllerrtness, will bring to your Self-Consciousness not only a certain understanding of possibilities of practical realization of a Principle of “personal” Immortality (when in one’s own way it will be possible not surgically, but on a genome level easily to alter features and age of one’s own physical body), but also effective solutions of long-time “human” dreams of levitation, teleportation, telekinesis, and telepathy. Even for children it will be understandable that conscious translation of “quants” of Thoughts and Feelings at any distance from one man to other is not only possible, but also natural, because this particularity of Energy-Plazma is initially included in properties of highly developed Forms of Self-Consciousness. Firstly these possibilities will be implemented technically, by means of different devices and accessories, for your Self-Consciousness to become firmly convinced of reality of realization of such manipulations, but little by little and duvuyllerrtly you will refocus in that groups of Continuums, where these abilities naturally come out in yourselves, what will completely reformat all your Self-Consciousness and became an active creative part of all social and cultural structure of “future” human community, your real Experience of existing in subsequent tens of years.

15.17723. And for now all “humans” are afraid of “Death”, to the last man! Especially those ones are afraid of it, who did not reach anything in their Life, was not of essential use to anyone, but was only a hard burden and parasitized on a society body. They are as tenacious of their worthless Life, as a drowning man is ready to hold even a straw. They do not want to lose it in spite of it is, on the whole, useless and do not bring joy to anyone, even to themselves. And all this fear is so tenacious of life only because no one knows what will be “there”, behind a “Death’s door”. This uncertainty scares and horrifies, depresses and paralyses, forcing to cling to life at any price, to postpone its “inevitable end” for as long period as possible.

15.17724. And here comes a Knowledge, in which quite clear, well-founded and reasonable is being approved, that exists a possibility to live forever, that Immortality – is a destiny for every one of you, it is just need to become aware of it, to understand and deeply assert oneself in completely new for you Conceptions. Only became conscious of yourself as of real human (without quotation marks) and brought one’s own Self-Consciousness in qualitative correspondence with all features, characteristic for all people and described in detail in IISSIIDIOLOGY, once you will be able to get automatically all you now strive for, and also an opportunity to realize oneself in much more perfect and harmony human Worlds. Any extraordinary abilities you always acquire automatically, at the expense of more qualitative refocusing. By becoming more perfect, more intellectual and more altruistic, sequentially you just become who you already are in more favorable variants of your “individual future”.

15.17725. Some ask: “And why we still do not know how to fly?”. Firstly, because under the circumstances of such a high level of potential injuriousness of selfish mind, which is typical of most “current people” and is able to manifest only through cunning, meanness, greediness, cynicism, hatred, possession of such responsible abilities would considerably intensify an influence of such destructive factors on effectiveness of development of imperfect “human” civilizations! Secondly, far not all representatives of highly developed human civilizations possess this opportunity (exactly to fly, and not to levitate or to make “salutatory” movements), which just is an evidence of raising of Creative Activity in “unpacking” dynamics of Self-Consciousness of high-qualitative Form-Creators of definite Aspects of Quality ALL-Unity. By the way, much more convenient and effective is a possibility to teleportation, when it is possible practically instantaneously to “self-project” to not only any spot of Earth, but also to other Planetary, Stellar systems.

15.17726. At first became more human, more intellectual, more love-abundant, - then you will be able to fly, and to teleport oneself, and mental-sensationally to communicate with each other distantly, and to “see” through any distance, and many-many other things. Because all of you are endowed with these universal possibilities initially! In turn, it is possible to become Humans only when you get rid of present powerful СВУУЛЛ-ВВУ-dependence, which, being a source of all your destructiveness, makes your life creative work destroying and entirely unpredictable (although anti-creative types of “human” civilizations like this are also need for maintenance of slloogrent condition of universal balance).

15.17727. But really to become Humans, you have to go through long period of “child-youth” states of absence of necessary synthetic Experience and, acquiring it through difficulties and complications of low-qualitative choices, to become so spiritually mature, that to sacrifice one’s own animal instincts easily and joyfully. Moreover not only by “muting” or somehow “suppressing” them in oneself, but by feeling them deeply and by experiencing them in full, deeply to realize that it is already do not need and is absolutely not interesting for you. The longer and more often through your choices will be able to realize high-frequency СФУУРММ-Forms of Planetary Altruism (2-3-d synthetic Levels АИГЛЛИЛЛИАА-ОРЛААКТОР), devoid of tough egoistic selectivity of national and state Ideas, the more will appear opportunities for you not only for purposive and conscious refocusing in more and more qualitative НУУ-ВВУ-Configurations, but also for more effective changes of supplement spheres of your individual creative work.

15.17728. Any intellectually developed “human” will be able to understand, that all, what is stated in the IISSIIDIOLOGY in details, simply and easily lie on not only one’s scale of intuitive Perception, but also on logically-analytical potential of advanced mind. By profound mastering this Universal Knowledge all structure of Creation performs as United Picture and everything, that seemed to be so separate and contradictory before, rank one’s own logical seat in this harmonious system. All evolutionary Principles as a matter of fact add up to one: by seeking for self-perfection, it is need to put all efforts to make every next moment of experienced by you states at least just a little bit better than a previous one. Once you will stop to put former efforts, because these positive states will already be natural and easy part of yourselves, transformed in tendency and principles of your existence. Then return to less qualitative choices will be just impossible! That will be an indicator of that you sequentially lose your own psycho-mental animal character and become Humans, entirely getting rid of impulsive animal reactions.

15.17729. The most important in studying of the IISSIIDIOLOGIE – is to start as fully as possible to live in a world of this Knowledge without waiting for a completion of this process (which will never

come), thinking through, doubting, asking oneself and bravely checking up answers on a practice of “interpersonal” relations. Thereby you will not only increase effectiveness of a process of one’s own self-perfection, but also will be actively further evaluating of “humankind” surrounding you (only at the expense of refocusing in more qualitative Continuums). And for realization of this it is need to be able to sacrifice selfishness, that is to get rid easily of a lot of that, without what your present Life, as you believe, would devoid of sense.

15.17730. It is important to understand, that this Knowledge – is a main composing component of “medication” of “Death” fear. In order for “humans”, 80-90 years old at present, to refocus in those Continuums, where they with help of directed genetic modifications and nanotechnologies will be able to become 30-40 years younger physiologically in 3 years, it is necessary just to become kinder, more altruistic, more intellectual, by self-perfecting one’s own Self-Consciousness persistently and surely by means of iissiidiological CΦYYPMM-Forms. Why, more qualitative of their “personal” interpretations, who managed to refuse selfishness and material bindings, have had already made it! Besides they did not just “throw off” redundant tens of years, acquiring former vivacity, health and youth, but saved their own entire life Experience and their own possibilities, except maybe only superfluous sexuality, which much less is characteristic of people of “future” favourable Worlds.

15.17731. At present individual refocusing to more high Levels of creative manifestation of Collective Self-Consciousness of “humankind” are being implemented only through iissiidiological CΦYYPMM-Forms, structured with “flyuaazans”, “flyuotons” and “kluazans”, and also with “newmons” and “viewlons”. All other Levels and types of materiality, structured with low-frequency BBY-Configurations of selfish Aspects, are destructive towards to Forms of Self-Consciousness of “future” favourable Continuums and therefore demand from all “humans”, who consciously strive for harmony self-perfection, a radical revision of their own former limited Conceptions and speedy rethinking of one’s own “present” narrow subjective views and selfish relations. For now only in systems of education, accepted in contemporary Ayfaars, has an opportunity to arise and to self-perfect absolutely new type of “future” human society, which life creative work is based on Principles of uoldmiizm and stollmiizm. At the expense of attraction of enormous financial means and of participation of hundreds of thousands intellects of genius in “future” Ayfaars will locally Embody all newest technologies, means of communication, will be working through absolutely new interconnections in economics and production, in education and enlightenment, in culture and philosophy, in science and spirituality.

15.17732. Most developed, intellectual and high-feeling humans will arrive in Ayfaars not only to obtain a new Knowledge, but also, by perfecting intellectually and being inspired by supreme Altruism, to bring this Knowledge further – to their own peoples and in their own countries. Probably, that is why precisely “indigo” children, initially gifted with immensely high extrasensory and intuitive possibilities, which stimulate in them an ineradicable Aspiration to highly-spiritual creative realizations, will irrepressibly gravitate to Ayfaars, which will start to be organized in the nearest years throughout the Planet, like mushrooms after summer rain. Only they - highly gifted and spiritually aspired representatives of new human Race, able intuitively and easily to separate Truth from lie, - immediately will be able to evaluate the greatest evolutionary significance of the new Knowledge and quickly fill free information resource with it: Internet, media, literature, production of videoland and movie industry.

15.17733. But the most interesting is that many of children of nowadays billionaires, millionaires (who are called «golden youth») also belong to «indigo» human Race. Had received in use such a deep and versatile Knowledge, they, being inspired with it, will be able to change fast their own egoistic views to the opposite, had understood and become aware of that, how to dispose to the best advantage for all “humans” of that huge reaches, which have accumulated their beyond measure greedy ancestry. And, as you already know, the most effective way of financial means investment – is to use them for the fastest manifestation in reality of the most highly human and spiritually perspective Idea of modern times – organization of Life of completely new human community on the basis of building of many «Cities of Light and Knowledge» («future» Ayfaars), which high-altruistic models of individual self-perfection and rich experience of «interpersonal», social, production and other interrelations will become basic for use and their fast dissemination on all continents.

15.17734. At the same time in all spheres of political, economic, financial, cultural, scientific and religious Life, to replace present, aggressive-conservatively aimed figures of outgoing age of world stagnation, will headlong flow in young «indigo» stream of entirely in a new way – altruistic-intellectually - thinking politicians and administrators, state and religious figures, scientists and businessmen, whose Self-Consciousnesses are not infected with egoistic CΦYYPMM-Forms of corruption and money grubbing, cynical enrichment and unscrupulousness, capturing and aggression, terror and discrimination, and also religious fanaticism, conservatism and dogmatism. Precisely they –20-30 years old representatives of «future « human Race, rezonationally «reprojected» by their own Self-Consciousnesses in «present» Continuums from a lot of more developed variants of human civilizations, - at an early date will become the most active reformers and builders, spiritual inspirers and organizers of human community of absolutely new type.

15.17735. What kind of system will it be? I would provisionally determine it as scientifically-spiritual, that is formed on the basis of inseparable interaction of rational merits of high intellect and altruistic potential of high spirituality, form joint realization of which grows all industrially-social economics, and morally-ethical society principles, and totally new form of united world statehood. I would say only one thing: none of existing progressive (democratic) systems of state-political and socially-economic view is not presented in «future» world system in its «present» state. While all manner of chauvinistic, nationalistic, extremist, racist and other movements and parties presence is out of the question, because realization of society in their characteristic CΦYYPMM--Forms would become not interesting to anybody. As that everything what, by the way, is now united by us in a concept «politics», in reality is the embodied of all the most mean Conceptions of socio-economic and intergovernmental relations.

15.17736. It is interesting, that «current» parents can be totally far from strivings for intellectual and spiritual development, while children with heightened spiritual, psychical and intellectual talents might be born to them. Scientists had already noticed a long time ago, that now on Earth incarnate absolutely new, special generation of «human» Forms of Self-Consciousnesses, who has in a greater degree, than their parents, definite directivity of development. That is in multipolarizational focus dynamics of their Self-Consciousnesses in these groups of Continuums the most activated is that «sector», which allows them not to react to opportunities of less qualitative realizations, but intuitively refocus just in those peri-lluuvvumic Directions, which allow them to implement in a best way evolutionary Objectives and Goals, which are set not only for them, but for whole Streams of Forms of Self-Consciousnesses, specialized just in implementation of lluuvvumic Scheme of interqualitative Synthesis.

15.17737. “Present-day” children are to a much greater extent adapted to search, processing and mastering of voluminous flows of all kinds of Energy-Information, which they intuitively filter off and fix as Experience, which will be needed for them in “future” for finding decisions to their own evolutionary Objectives. What “imbibe” and then consciously apply in life creative work today’s three-, four- and five years old children, adult «human» of the beginning of last century would not be able neither to understand, nor to implement. It is already became obvious, that to replace «present » generation wholesale comes generation with completely new potential creative inclinations, possibilities and realization abilities, which literally from childhood starts very actively to fill Continuums with universal Conceptions, easily bridging a reliable gaps from quite primitive and imperfect «present» to more favourable and harmonious variants of our «future». These are – Forms of Self-Consciousness, neatly oriented to increasing of Level of Collective «humankind» Consciousness and to radical intensification of high-frequency dynamics in all spheres of life creative work. Each of them starts to display one’s own abilities strictly in accordance with that hvasslonic program, which will allow the new generation in these groups of Continuums to help the rest of «humans» quickly to implement Goal set before them – to refocus in more qualitative Forms of Self-Consciousnesses.

15.17738. “Indigo” youth, not looking back, at the «past», and already having intuitive Experience of all ever implemented by us trials and errors, will resolutely introduce and bravely realize in practice in all creative spheres of socio-state activity totally new Conceptions of more true Forms, Sense and Essence of human Existence. In search of more authentic and wise answers to most urgent Life questions, they will easily and quickly come to understanding of immeasurably value and vitality of Universal Conceptions of iissiidiological Knowledge for further human development, which high Principles will underline «World Charter» and «United Constitution of human Races», declaring absolutely new principles of new intergovernmental system.

15.17739. It is need to be told, that we live on the eve of quite short by time and powerful by its intensity period of greatest changes in quantitative and qualitative structure of the whole earthly population. Innumerable quantity of all kinds of prophecies exist, belonging to representatives of different historical ages, which point out a particular state of that time period, in which we are subjectively aware of ourselves «now». Such periods have been before as well, but due to a strong inertance both of focus dynamics of Self-Consciousnesses and rotationally organized by it Space-Time, similar transitional stages dragged on for long decades or even for centuries. «Present» time – it’s a different kettle of fish, indeed! Due to swift increase of quality of thinking and feeling, a process of individual refocusing into different-qualitative groups of Continuums also became to speed up in proportion, what is reflected subjectively in Self-Consciousnesses of «people» as a sequence of sharp qualitative changes, happening both in «personal» Life of everyone and in states of the whole «human» community. Implementation of that, for what before decades was needed, now take only two-three years, radically changing literally before our eyes.

15.17740. One thing is doubtless: general part of intellectual and altruistic «humans», who in a greater degree are being aware of themselves not as of exploitative ballast, but like a creativity-originate part of the society, rapidly increased in last decades. But nevertheless, part of those, who just is thinking primitively and of those, who is thinking intellectually, but egoistically, as yet considerably predominates in focus dynamics of Collective Self-Consciousness of «humankind». These different-qualitative types of Creative Activity, forming resultant Vector of common focus dynamics of the whole “present-day humankind”, now are at a ratio of one to three. It explains that high degree of

being psycho-mentally out-of-balance in now focused by you groups of Continuums, which induces definite Planetary Mechanisms of Form-Creators, destined to maintain universal balance between different-qualitatively interacting Forms of Self-Consciousnesses, to proceed to implementation of typical of them correctively-adjusting functions.

15.17741. And it is absolutely true, because none of «future» global high-qualitative transformations of degree increase of your self-consciousness and spirituality would be simply impossible to carry out with such mixed and different-qualitative in one's own evolutional development structure of «present-day human» society. The essence of these changes adds up to that Form of Self-Consciousnesses, which serve as evident bearers of destructive types of low-frequency energy-information interrelations, principally not ready to adequate perception of new highly-intellectual and altruistic Ideas, which are a basis of all human interrelations in «future» favourable (in a greater degree corresponding to features of Iluuvvumic Direction) groups of Continuums.

15.17742. But at the same time, professed by them egoism is a normal and necessary condition for Synthesis of different-qualitative Experience in less harmonious Continuums of our simultaneous Existence. That is why in such cases most of egoistically aiming and primitively thinking «humans» start to refocus in great numbers to less qualitative, but in a greater degree resonating with their Conceptions, groups of Continuums, while the most qualitative part of the «humankind» starts to refocus in great numbers to more favourable development scenarios, carrying the most ready «humans» from the «middle» part away by spiritual Ideas, that is already intellectually developed, but as yet moderately egoistic, and also more altruistic, but as yet insufficiently intellectual. Being manifested in a more qualitative environment, they will quite fast synthesize in their own Self-Consciousnesses CΦYYPMM-Forms of more developed people, becoming the same active participants of highly creative evolutional transformations in human society.

15.17743. But the least self-conscious part of «humans», refocusing to less favourable for existence groups of Continuums, also involves in dynamics typical of them egoistic Interests (by means of strong «interpersonal» and creative linkages) of those, who is already intellectually developed, but has in the meantime in no way insuperable needs (strong interests) for all possible types of material realizations. Focus dynamics of Form-Creators of Self-Consciousnesses of this small part of «humankind» for more primitive majority acts as an incessant egllerolift Impulses generator, permanently orienting and psycho-mentally stimulating life creative work of the most egocentric «humans» to more qualitative displays. Thus, one part of the most mass «middle» will partially refocus to less qualitative scenarios, which structure more favourable Continuums, and other part will refocus to more qualitative scenarios of less favourable Continuums. Exactly that are directions of this basic Vectors in which «now» a process of totally-individual multipolarization of Focuses of Self-Consciousnesses is implemented through slloogrent areas of appropriate groups of Continuums.

15.17744. To each inertial development stage of either «human» civilizations particular mechanisms of qualitative balancing of destructive dynamics amongst mightily dissonational Forms of Self-Consciousnesses are inherent, which automatically regulate processes of their refocusing to most appropriate groups of Continuums. To such «mechanisms», besides large catastrophes and convulsions of nature, in particular, belong:

- various forms of sharp increase of radiation intensity of some general-spectrum region of solar activity;

- inversion-ray phenomena, leading to sharp increase of concentration of high-frequency kinds of Energy-Information in inertial dynamics of «near-earth» Space-Time, what mightily intensify interqualitative Synthesis processes and leads to mass “posthumous” refocusing of all biological Forms of Self-Consciousnesses to more adequate to them groups of Continuums;
- powerful magnetic fluctuations, in huge degree influencing on not only rise of cardiovascular and other diseases, but also on sharp increase of frequency of various technogenic catastrophes – at enterprises, transport, in resource extractive industry and so on;
- global climatic and ecological changes, that are contribute to all kinds of mutations in our biological organisms, which either increase, or considerably lower adaptive abilities of the HYY-BBY-Forms focused by Us;
- multiple mutations of «lethal» viruses and bacteriums, in a greater degree hitting low-frequency Forms of Self-Consciousness and do not causing special harm to more developed «humans».

15.17745. Owing to heightened actuality for all of us – in current development period – of exactly the last paragraph, I consider it necessary to remind you, that «human» organism represents not only an aggregate of several trillions of his own «human» cells, but also and more than 100 trillions of (!) bacterial, virus and fungous Forms of Self-Consciousnesses. As you see, in this Life bioconglomerate bio-Creators of «human» genome are not at all dominating, because by general quantity of all possible DNA-structures in our bodies in the lead are exactly bio-Creators of non-human (protoform) cells, in plenty injected into our organisms. That is what diffusgentance of Forms of Self-Consciousnesses is all evolutionally? about, what allows Form-Creators of every Proto-Form to form necessary synthetic basis of energy-information interrelations with other protoform Form-Creators so that to «be reprojected» to even more universal Forms, which are inherent in their Collective Intelligences. I has already repeated more than ones, that currently focused by You biological analogy of HYY-BBY-Form-Types are not Human, but represent temporary, transitional Form of Self-Consciousness, which allow in right degree to synthesize (accumulate) that protoform Existence Experience, which is so essential for all of Us, as «future» Humans.

15.17746. From the position of your inertial-subjective perception, bacterial, virus and fungous bio-Creators already safely inhabit the Planet in different qualitative states about five billions years, that is they began to manifest actively in different groups of Continuums long before the time, when by Form-Creators of more qualitative Levels of Energy-Plasma was organized and manifested all innumerable set of other biological Forms of Self-Consciousnesses both animals and plants. Bio-Creators of above mentioned microorganisms became peculiar «pioneers» in the most sophisticated processes of synthetic diffusgent forming of genetic fundamentals of each of this biological Forms and, after they have started active symbiotic and genetic interrelations with bio-Creators of new organisms, actively promoted inertial process of forming and manifestation in all without exception groups of Continuums of 3-4-dimensional diapason more and more qualitative analogs of biological Form-Types of each of Proto-Forms.

15.17747. It was they who introduced all now existing life support mechanisms, common for the majority of carbonic Forms of Self-Consciousnesses: principles of breathing and photosynthesis, assimilation and disassimilation, enzyme catalysis (powerful intensification of biochemical reaction)

and methods of nitrogen fixation and so on. Absolutely all biological Forms of the reality around, as well as we, literally are immersed in all-planetary network of their specific creative dynamics and in a great degree consist of themselves and of products of their life activity. For example, in our intestines owing to life activity of many specimens of bacteriums are being formed very useful and extremely necessary for our organism substances – lactic and succinic acids, various amino acids, vitamins K, B12, B3 and many other.

15.17748. Form-Creators of their high-organized types of Collective Intelligences fully control and direct activity of their own bio-Creators in each of narrow-frequency resopasons of their manifestation in biological Forms. Owing to ability to exchange genes not only among themselves, but also with bio-Creators of other Proto-Forms, the entire empirical Experience of bio-Creators existence of one kind of microorganisms (of the same species) quickly become a property of all other (for example, due to presence in genomes of so-called «jumping» genes – transposon, among which there is also an antibiotic resistance gene). Owing to that known to scientists for a long time before and being regarded as absolutely safe for us bacteriums under certain circumstances begin sharp to mutate, acquiring qualitative new for them characteristics, which makes them dangerous for «human» (for example, modernized in last years and spreading all over the world E.Coli bacillus).

15.17749. Besides that thousands of genic bio-Creators represent in our organism various specific functions, typical of protoform Form-Creators (of both animals and plants), functional activity of even more than 300 genes (bio-Creators) of human organism is directly interrelated with bio-Creators of protoform Directions of viruses and bacteriums. Degree of their activity in organism is being determined by vibrations frequency of CΦYYPMM -Forms, being rezonationally attracted by them from these or those Directions. Therefore, as soon as «unpackings» quality of your Self-Consciousness lower in it's frequency to definite conditions of stable manifestation, then viruses, fungi or bacteriums, adequate to this conditions, start to become activated and to be reproduced as if in human organism itself, causing these or those symptoms, syndromes and diseases, which, in turn, by entering into rezonation-dissonational interrelation with narrowly-specific dynamics of bio-Creators of other Directions and by initiating in Self-Consciousness definite background svilgs-spherations, easily can lead to realization of interqualitative Synthesis in this frequency resopason, that is, to tragically perceived by everybody who are around fact of “personality Death”.

15.17750. There is great number of objective reasons for unexpectedly rapid «unpacking» in your nearest «future» various «pandemic» scenarios. One of the most alarming and dangerous symptoms, indicating a strong destructive disbalance of focus dynamics of contemporary «human» society, demanding immediately interference of above-mentioned corrective Planetary Mechanisms, is an unbalancing of Earth biosphere because of careless (or rather - insane) destruction by «humans» of main existence principles of natural ecosystems. As a result of this in the recent years mutations of disease-producing bacteriums and viruses became more frequent extremely sharp, calling pandemics of not only already known “death” diseases (typhus, tuberculosis, plague, anthrax, lupus and other), but also of unknown before infectious diseases (AIDS, hepatitis-C, «bird» and «swine» flu, «mad cow disease» and so on), which appear and large-scale spread with historically unprecedented speed. In addition, in spite of difference in genomes, more and more diseases appear, peculiar to both «humans» and other Proto-Forms.

15.17751. One more reason for «pandemic» scenarios development – a sharp climatic conditions change, that promotes not only more and more sophisticated «modernization» of old viruses,

bacteria and appearance of extensive areas of their new types, but also increases probability of repeated appearance in our Life the most dangerous of already, it would seem, definitively «beaten» before types of «deadly» diseases. Similar might happen as a result of occurring everywhere bringing back into service of anthrax burial grounds for animal refuse in the Arctic and tundra, during archaeological excavation of forgotten «humans» and animal burials in Europe, Africa, America and Asia, dead of epidemics of smallpox, plague, cholera, murrain and so on in different historical epochs. Mass emergence of «deadly» niduses of infections is quite possible simultaneously on different continents.

15.17752. For example, only on Russia territory it is officially registered more than 120 thousands of anthrax burial grounds for animal refuse, but not less quantity of spontaneous burials are not fixed anywhere and do not have exact address. The same regrettable situation is with probable niduses of bacterial-virus infection is now observed in many other countries. In particular, Russia and USA are now unique countries, where smallpox is being stored and is cultivating in research centers as a potential biological weapon up to now. All this – is like planetary delayed-action bomb, for activation of which some critical limit of destructive state of «humankind» Collective Consciousness is a detonator, - after it's achievement starts the Planetary Mechanism of world population size regulation owing to mass «humans» refocusing into rezonationally more adequate to them groups of Continuums.

15.17753. Besides that, it is also shouldn't be forgotten, that sexual “humans” activity with every year will start to decrease inexorably, what will very fast lead to sharp reduction of birth rate (instability of economic, political and sociological situations, accompanying «current» crisis, will also extremely influence this process), while a percentage of ones who are «dying» at advanced age (that is the most conservatively aiming population part, whose Self-Consciousnesses are simply not able to apprehend and master radically new high-frequency Ideas), on the contrary, will increase very much by virtue of powerful disbalance of eco-climatic factors. This only circumstance will face «humankind» the fact of global and insoluble (under circumstances of collapse and total incapacity of «present» system of socio-economic and intergovernmental relations) demographic «catastrophe». Increase in world population will not only stop, but also will swift slow down, forcing governments of all developed countries actively consolidate themselves to search effective solution to this problem.

15.17754. In different development scenarios of common focus dynamics of Collective Consciousness of «humankind», at the expense of powerful activation of one or several of these factors, in the nearest decades qualitative and quantitative world population state will go through very intense changes: in more favourable development scenarios it will decrease by two thirds, become much more qualitative, while in less favourable – it will also intense decrease, but relations between «humans» will become even more egoistic and destructive. There are, of course, a lot of other – not so extreme, more «averaged» - further development variants, but all of them, in due course, will also lead to essential necessity of the same radical qualitative differentiation. The difference between them is only in time. This Information is not a some kind of another «horror story» about inevitability of sufferance of some not very pleasant changes in existence by all of us, but it serves as a not relevant reminder to you of regularity and naturalness of Reasons of any qualitative transformations, simultaneously happening in your subjective psycho-mental dynamics and in objective reality surrounding you.

15.17755. Each of you as yet has a real chance and time so that deeply, responsibly and seriously to think about to which of possible groups of Continuums to «project» focus dynamics of your

own individual refocusing, but these decompositionally-egllerolift cosmic processes are already becoming even more appreciable part of our everyday Life (in fact they never stop, while just change intensity and order of their own manifestations!), automatically correcting multipolarizational refocusing process of every “personality” to spheres of rezonationally most adequate to it creative manifestations. In your place I would not once again postpone “for later” the solution to this, the most important for all your «future» Existence, question.

15.17756. Because the Truth of our further Existence is that in lluuvvumic development Direction of Collective Consciousness of the «humankind» the most favourable “future” variants are reached, mainly, at the expense of making of hundreds of thousands of highly-organized Ayfaars all over the world – industrially-ecological, culturally-educational and spiritually transformative socio-scientific centers – «Cities of Light and Knowledge», in which absolutely all relations between inhabitants are organized only by principles of ayfaar Way of Life, that is on the high-intellectual and high-feeling altruistic basis of iissiidiological Knowledge, organically and deeply interlacing with New science, art and culture.

15.17757. Already now the process of global climate changes which started to develop in leaps and bounds all over the Earth, considerably intensified with critical ecological situation, will cause «posthumous» refocusing of enormous quantity of unprepared Forms of Self-Consciousnesses, which Focus dynamics qualitatively decreased to the extreme low limits of egoistic manifestation and almost animal, impulsively-unconscious existence. The same is true for animal and vegetable Forms of Self-Consciousness now surrounding us, or rather, for representatives of the most aggressive and bloodthirsty of known to us kinds of Proto-Forms. Because of climate warming, glaciers breakup and disorder of movement disturbance of Gulf Stream current will happen serious planetary changes not only in climate and in inhabitation areas of animals but also in species composition of flora and fauna surrounding us.

15.17758. So, for example, in several tens of years the great mass of such bloodthirsty wild animals, as tigers, lions, cheetahs, lynxes, pumas, leopards, crocodiles, boas, wild boars, bears, wolves, foxes, and also all varieties of predatory birds, insects, fish and plants (and similar to them by degree of their aggressiveness) will just in great numbers die out by different to this objective reasons. But not completely! To the change of existing Proto-Forms in same flora and fauna species, will appear other, only reminiscent of nowadays ones, peaceful and more intelligent species, which Forms of Self-Consciousnesses are already synthesized in more qualitative Levels of duvuyllerrt-diffusgent resopasons, frontier with correspond Directions of protoform development of «human» HYU-BBY-Form-Types. Form-Creators of Self-Consciousnesses of new kinds are to a much greater extent, than of «nowadays» Proto-Forms, adapted to DRF-dynamics of high-frequency «human» CФУУРММ-Forms, that is why they better understand «future humans», devoid of aggression and bloodthirstiness, are able to reciprocate their peaceful intentions.

15.17759. I also must to note that in more qualitative dynamics of favourable variants of our «future» development «Death» fear and now so frightening for all of you conception of inevitability of «oncoming old age» very soon will completely disappear from everyday Life, and between humans, guided by iissiidiological Conceptions, will be established only tolerant-confidential and highly-spiritual relations. And already not sex and egoistic «personal» affection at all will play a prior part in them, but a degree of harmonicity and individual creative compatibility, following by in no way inconsumable and huge altruistic desire to realize oneself creatively in something truly

important, global and useful for everybody. One's own interests – receiving fundamental support of IISSIIDIOLOGY Knowledge and consolidated on its basis most important branches of science – in natural way will be transformed into only one devout Wish – to have opportunity consciously and devotedly to Serve an Idea of human civilizations perfection.

15.17760. That is the prime reason, due to this ineradicable and unquenchable Desire – to Serve you with all one's strength and possibilities – I subjectively manifest as focused by Me Forms of Self-Consciousness beside you as well even «now», though – on the assumption of possibilities “I” have – I could be not conscious of myself in destructive conditions of these imperfect Continuums. But if to deprive me of possibility to give you more true Conceptions of your eternal «personality» Existence Sense and Principles, then the Life in these contradictory Worlds will become just meaningless for me. To opportunities to experience these astonishing, lending wings and joyful states a lot of you will come already very soon. Then you will understand what spiritual Beauty and potential Power is concealed in the Serving Act itself! None ambitious or sexual enjoyment cannot compare with this high-altruistic experience! The more high Goals and to more quantity of spiritually developed humans you acquire an opportunity to Serve (but not to dance attendance!), the grater spiritual euphoria because of this you experience yourself. And exactly this unique and exclusive by its creative power state become for you in the sequel the most effective stimulus for even more spiritual and intellectual self-perfection.

15.17761. In the most favourable for us scenarios all this will start happening already in the next ten years, which will become crucial, important and basic to the great mass of «present humankind». All in the World around will change oneself swift and irreversibly, being trans-figured qualitatively not only in a direction of even more awareness of significance in your Life of high-technological supply but also in a direction of more harmonious and balanced relations in «human» society, a degree of socially-economic stratification of which will rapidly decrease.

15.17762. To become conscious and full-fledged participant of these creative and highly-spiritual processes, already now it is necessary to start cultivate in oneself powerful Aspiration to global joint Creativity in some of the most interesting Directions of your possible development. On the Earth is coming a time of rapid increase of realizational possibilities for highly-intellectual and highly-spiritual part of «humankind», which has already synthesized in sufficient degree the lowest Levels of Self-Consciousness and is potentially ready to become firmly convinced of much higher-qualitative creativity. To such «humans» any religious versions «about world and human being creation» are already completely uninteresting and ridiculous, while rational, logical and absolutely exact systems of knowledge are need, which suits their highly-intellectual possibilities of understanding and increased creative needs. And in the meantime IISSIIDIOLOGY is the only one of nowadays existing Knowledge system, which harmoniously coordinates spiritual Aspects with material, high-feeling with rational.

15.17763. For example, deep in this Knowledge, geneticists will be able to understand, that genotype, hormones, neurons, amino acids and other genetic material of any biological organism, – are molecular realizational manifestations of bio-Creators (Form-Creators) of different-qualitative low-frequency Energy-Plasma Levels, performing their own functions under the influence of egllerolift Impulses, which are being incessantly generated in Self-Consciousness by more experienced Form-Creators, Configurations of which structure even in a greater degree synthesized Levels. All electric and biochemical dynamics of brain, nervous and other the most important life support systems are

also subordinated to them. Where are they «situated»? In energy-information structures of more qualitative analogs of HYY-BBY-Forms, slloogrent interacting with HYY-BBY-Configurations of your «present» Forms of Self-Consciousnesses.

15.17764. In what way is it possible to influence the most effectively on some *of DNA fragments* to get determined result? IISSIIDIOLOGY gives efficient and clear instructions for «future» scientific methods: by the wave way of quantum-holographous information reformatting of initial development Program (*«quantum modeling», «photon decomposing», «quark-photon aggregation»*), *that is implementation in focus dynamics of need Form of Self-Consciousness (in this case – DNA code)* of enough powerful and stable egllerolift Impulse, which induce definite genes to more active manifestation in chromosomal dynamics, which are responsible for «unpacking» in Self-Consciousness of necessary to you Energy-Information. That, as a matter of fact, represents a frequency resetting of focus dynamics of explored by you Form of Self-Consciousness and purposive correction of refocusing process of its Form-Creators into Configurations, where a qualitative state that you need is initially available.

15.17765. Making thorough experiments on the basis of this Knowledge, scientists will determine which exactly of «personality» DNA fragments correspond to definite types of Creative Activity of Form-Creators in its own Self-Consciousness, and will be able to use this particularities for implementation of purposive genetic engineering. So, it is literally «now», in the nearest years not terrible esthetic surgery or painful procedures with botox will become the most popular, but little capsules, incepted which will be possible – at the genetic level! – not only to completely get rid of lines in the face, but also to forget about other unpleasant evidences of forthcoming old age (testosterone decrease and libido loss, menopause, gray hair, skin sagging, crunch and senility of joints, visual impairment), and also to change color of eyes, hair and even skin. After conscious application and getting lots of practical evidences in all possible development Directions, this Knowledge soon will close unite with science, providing it with more authentic Conceptions of true Nature of nowadays already existing fundamentals.

15.17766. In the nearest term it will become technically possible with the help of special portable devices to give any images data (they will also have a function of quick identification of faces with enclosing brief information about each one of these humans, and also human speech) or «moving text display» of need to you text from PC directly to retina, to see through wall and clothes, easily to identify the contents of bags, suitcases and briefcases, to become temporarily invisible for others and many-many other things, which cannot be even imagined today. It will be possible to go online with due to contact lenses. With their help, by the way, even blind humans will also be able not only perfectly to see the reality around, but also easily to orientate in virtual Web-space.

15.17767. In the nearest decades, at the expense of the swift nanotechnologies development and molecular-genetic restructuring of biological body, considerable part of Forms of Self-Consciousnesses of the «humankind» will synthesize in itself possibilities, necessary for purposive prolongation of active creative being in more harmonious and universal states. You will get an opportunity to load your mind into quantum computer easily, «projecting» in your Self-Consciousness three-dimensional «images» need to you, to pass your Thoughts and images to somebody at a distance. With help of holography (frequency of manifestations - 180-200 shifts for a sec.) you will be able individually to model for yourself on the computer (or choose from already ready-made models) such Form of

manifestation, psycho-mental and external characteristics of which would correspond most of all to expected by you properties and qualitative reaction.

15.17768. All that qualitative tendencies, which you would like to intensify in your own «future» Form of Self-Consciousness or, on the contrary, to weaken, with help of laser emission exactly directed in particular brain areas (activation in Self-Consciousness of sub-chakram refocusing in definite direction) can be changed and stably substituted for expected ones. It will become possible due to deep understanding by scientists of that fact, that a holographic DNA model of your «present» Form, FUA-DRF-dynamics of Form-Creators of Self-Consciousness of which in a wave way influences on degree of Creative Activity in TES-«unpackings» of CΦΥΥPMM-Forms of these or that Levels, can be purposefully re-programed, being refocused in a short time to required Forms, properties of which are in a greater degree correspond to your new creative needs. When these needs will be satisfied, focused by you Form of Self-Consciousness – with the help of identical method of *«laser-wave accencioniring»* (the term is from «future»: *«to intensify a possibility to manifestation of something»*) – will be possible to replace by a new one, which meets your other needs.

15.17769. Approximately same results, but during a more long term, will be achievable also with the help of individual developments of special microscopical nanodevices (nanorobots), programmed to penetrate deeply in chromosomal structure of every cell either purposefully to reconstruct it thoroughly, or slightly to correct it. How will it be implemented? After introduction of several nanorobots into an organism, they proceed to intensive self-duplication (at the expense of chemical elements in organism) at the beginning, gradually – like viruses - filling with themselves cells of all systems and organs, and after it proceed to implementation of included in them program of the whole biological organism reconstruction.

15.17770. When task laid on them will be fully executed, a toxic for them substance is being inserted and they become immobilized, outputting from organism together with products of intracellular metabolism. For example, if you would like to change a shape of your face thoroughly, then to nanorobot program is being inserted all detailed sequence of genetic changes, which it will have to implement in determined chromosomes regions. After that it is being injected into your organism, multiplies independently and during some period of time gradually changes all your face: eyes color, shape of nose, lips, ears, forehead and so on. When desired results are achieved, all nanorobots are being excluded from the organism.

15.17771. All this became possible owing to human genome discovery. Already now scientists know which DNA fragment and which genes are responsible for what, and in the «future» it will be possible to regulate work of practically all necessary genes regions – to choose a program to activate one genes and to suppress another ones. But afterwards «dense-plasma» computer holograms will became the main way of quick replace of one biological body with another - «biostrassas» (main long-term «body-envelopes») or daily «strayed-breadds», which it will be able to change just as you change today clothes, in accordance with one's own mood or needs, projecting this or those public image of «yourself». It will become possible, when vibrations frequency of holographic rays, generated by a computer emitter, become stably close to 270-280 “frames” per second. There will be countless numbers of all kinds of such “breadds” on your personal computer, they will not be subject neither to diseases, nor to aggressive environments influences and to physical damages, and it will be possible to «enter» them by mean of two-three minutes' long Meditation with the help of electric stimulation of definite regions of the brain.

15.17772. Their external appearance can be the most unbelievable – starting from blue airy «cloudlet» to «sunlight spot», from «animal» or «bird» up to the most beautiful «human» forms of any sex. Besides, several variants of strayed-bredd(breadd) use are possible – active, passive, conditionally passive and contemplative. For example, using tiny bredd-modulator («psi-avangardors»), you can put your appearance into any, the most fantastic shape of expression (like «nowadays» masks, but for the whole body), leaving all your habitual abilities to interact mechanically with objects of the World around as well. In case of turning the psi-avangardor off, you will take on an external form typical of you again. It is called active breadd-form, which can be used at any moment, depending on circumstances (at a party, during a holiday, during a walk). As long as low-frequency CBYVJJI-BBY-Forms already will not be able to participate in «unpackings» of Form-Creators of your Self-Consciousnesses, the use of breadd-forms – for the purpose of robbery, stealing, deception, fraud and other similar intentions will be completely excluded.

15.17773. Or you yourself (your physiological body or stable biostrassa) can be in passive state at home (as if «sleeping»), while active Focus of your Self-Consciousness will spatially move with the help of modeled by you breadd-form within definite radius, which permits to it (to the Focus) to interact closely with your brain through emitter of your personal computer (in time this radius – at the expense of reliable satellite communication – will spread to almost all earth surface). Speed of breadd-form removal will be equal to degree of your Imagination activity, moreover it will be absolutely invulnerable to any, including physical, influences, because this is – just high-technological hologram, manifestation duration of which in the reality around will depend only on your interest and on presence of stable satellite communication with energy supplying resource (emittor).

15.17774. Everything happening with your breadd-form will be continuously translated to your Self-Consciousness and decoded adequately by it Form-Creators in the form of subjectively perceivable by you «images» and appropriate for them experiences. But incidentally you actually will not be able in any way to influence Forms of Self-Consciousnesses surrounding you, while just will be in a role of observer (you will also be able to make any physical movements in a distance, by connection to your personal “bingo” distantly – robot-android). At the beginning breadd-forms will be used only for individual and group trips to the farthest parts of the planet. But later it will become possible with the help of special codes, introduced in your computer memory (with recognizer) not only to make active observations at any distance, but also to communicate directly through satellite system of with breadd-forms of other “humans”, like you communicate by cell phone today, only this communication will be illusory-direct.

15.17775. Cell phones in their «present» functioning and execution (as well as photo cameras, variable video cameras and video players, players and dictaphones, and other mechanical “hardware” in time will completely disappear, being transformed to tiny PCs with lots of holographic functions, including taking pictures and displaying of Footage at any place: in the open, at the office, at home. They will give you information about any object parameters and distance from you to it, will make chemical analysis based on general emission spectrum and more else. It will be able to wear them round one’s the neck like small trinkets, which has almost infinite memory reserves.

15.17776. Thus, it will become possible, being at home or at any other place, through one’s own portable computer (at first reminiscent of nowadays smartphones and then – of a form of faceted crystal) to create through Internet an illusion of your presence at any desirable place: at conferences and public addresses, studies, and social intercourses, at public functions, parties, corporate parties,

concerts, performances, in different shows, television programs and so on. By the way, performances, concerts, movie industry, not to mention television, cosmonautics and a lot of other professions by themselves in reference to these inventions, will also be radically qualitative and structurally changed. Robotization will start swift to develop and as well inevitably being penetrated into all spheres of your Life. Robots will take humans place not only in the factory, but will undertake an execution of majority of daily chores: cleaning, laundering and ironing, dishwashing and cooking.

15.17777. And soon to buy anything in a store or to cook at home will not be need at all, because all this will be possible to get with the help of universal home scanner-replicators, which will be able to program a “substance” with the help of nanotechnologies, that is will be able literally by molecules to assemble and on sight spatially to «print» for you (in three-dimensional, material type) any, need to you thing or any, chosen by you from a long list, gastronomic oddity, brought to perfection of gustatory and nourishing qualities. Materials made of micro- and nanochips will also become very popular and widespread in household use, in production and in science, which will be repeatedly being formed and disbanded (that is, will be able to regroup themselves molecularly under the influence of particular electric impulses) with the help of special computer programs. In several minutes in any place by means of them it will be possible to make or to assemble both the most simple things (clothes, tableware, elements of building and interior, stands, stretcher and so on) and very difficult technological equipment, used in cosmos or in scientific laboratories.

15.17778. Holography will strongly enter all spheres of not only public, but also «personal» Life of everyone. Television of the «future», which will fully stream into information Web-space and become only a small part, also will have only three-dimensional image, furthering development of virtually-spatial Perception and cognition of the outer World, based not on atoms and molecules, but on bits of derivable Information. Owing to appearance in your Life more and more new and more improved «holographs» and «kalographs», and also more communicative and real «virtublers» and «cyborgsters», you will be able to get any Information you need at any time directly from «dense-plasma» holograms of those ones, with whom you would like to contact, regardless of where is this human and what is he doing, – absolutely all Information about him will be read with your «holograph» from holograms of focused by him HYY-BBY-Forms or from generated by his PC braedd-forms.

15.17779. In the same way you will be able simultaneously to send to the virtual Web-space, which will became holographic-reproducible as well, any amount of your own holographic «cyber-images» and braedd-forms, thereby increasing in hundreds times possibilities of your conscious communication simultaneously at different places with different “humans” in different interesting to you directions. The world will become really all-united, international, achievable in any of its points absolutely for all. Tourism industry as it’s nowadays archaic type will quickly disappear as being useless, because all the most detailed information about any geographical place will be possible to take from countless internet «holostublers» and «kablosters» (holographic restorers of subjective information of any human, built with personal impressions and experiences from being in this or that place), which will be located on special web-sites.

15.17780. From there it will be easy to «download» holographic impressions of any one about everything and, having started your own «holograph», really to experience and to see everything what somebody has already lived through. «Let through» your own Self-Consciousness several such «kalogramms», you will be able to determine farther, how much exactly this is necessary for you.

Especially valuable it will turn out to be in interplanetary research, during developing other systems of Stars, because it will be possible to restore in Perceptual system of any observer the effect of «personal presence» practically entirely.

15.17781. For exploration in far and unknown cosmos it will become not reasonable to use humans (although everybody will know as it is, that «Death» does not exist, while there is only a refocusing process, because to distant cosmos will be sent in millions lots with not only microcomputers of pigeon egg size (they will be able to move in space at the rate close to light speed), but also remotely-operated apparatuses with «crypts» (high-professional androrobots) with lots of apparatus-borne breadd-forms modulators, through man-made «perceptual systems» of which it will be possible not only to observe but also to actively control a program execution, inserted into computer «brain» of crypts. Millions of these envoys of humankind will be busy with search of extraterrestrial Forms of Collective Intelligences, giving them Energy-Information, typical of earthmen.

15.17782. Afterwards, when personal frequency characteristics of each of Planets and Stars under study will be clear determined and classified by scientists, it will become possible to teleport breadd-forms on them without help of aircrafts, construction and movement principles of which will be changed in a way you cannot imagine. Contemporary telescopes, mightily distorting not only «geometry» of observed Space, but also a present Time perception itself, will become a thing of the past, while on planets surfaces explored by people will be set powerful «triners» and «brommers», which will be able instantaneously to transmit all that is happening at a distance of millions light years and accept necessary holographic Information from other Planets.

15.17783. Such occupations as movie and theatre actors, variety artists and showmen on the whole, also models, dancers, gymnasts, acrobats, magicians, as well as many other, in such variants of our near «future» will become completely unclaimed, because everything what they are able to demonstrate to you today, will be possible to make much better and of higher quality with the help of breadd-forms and computer programs. At first these occupations will turn into uncommon hobbies, and after that will disappear at all, because quality of individual interests application will start to increase headlong and very quickly, unevenly to develop (thanks to intensive realizations in a lot of creative specialities and powerful sub-chakram refocusing, which are accompanied by these synthetic processes). Everyone's Intellect will increase so much that it will allow any of you easily to make your own programs degree of complexity of which «nowadays» hackers (who also will transform into high-class specialists) cannot even dream of for the present.

15.17784. Computer programmer, geo-, aqua-, nano- and astronaut occupations will become the most needed, because will begin headlong and large-scale exploration deep under the ground, of seas, lakes, rivers and oceans (geo- and aquanauts), all possible molecular structures and biological organisms (nano- and bionauts, with the help of breadd-forms penetrating into cell and DNA, into crystal lattices of any substances), and also Planets and Stars of the «nearest» cosmos (helio- and astronauts, starsfords). By the way, when individual teleportation with the help of portable devices will become the same generally available and habitual, as now mobile communication is, it will be possible, using special breadd-forms, programmed to manifest in definite frequency diapasons of different Time Flows, to tour both to the «past» and to the «future», without risking to be killed by religious fanatics or eaten by aborigines of wild tribe. Impressions of such «journeys through time» will be extremely believable, except that you will not be able to interact physically with anyone and anything.

15.17785. Afterwards it will become possible to teleport «in the Time» intelligent crypto-forms of aircrafts as well (within groups of Continuums, diapasons of Forms frequency manifestation of which has at least one coincident vibration sublevel with groups of focused by you Continuums; exactly in such – common both for us and for “them” - sublevel teleportation will be able to be implemented), joining countless army of «UFO-nauts», which were kicky for «humans» not only «now», but tens thousands years «ago» as well. For that in inaccessible places of Continuums of different historical ages by earliest explorers will be laid the same frequency emitters («triners» and «brommers»), with which in «future» we will supply every explored by us Planet for the purpose of teleportation.

15.17786. As a result of close consolidation of all «present» computer giant into one world consortium with practically unlimited financial possibilities and scientifically-productive capacity this type of industry will develop and improve headlong. Participation of human factor and manularity will in fact come to naught in production. Besides, a «hardware» share in computers will decrease incredibly swift, and forms of PCs themselves will more resemble beautiful crystals, reacting with instantaneously «unfolding» in space holographic image only to specific activity of individual brain frequencies of a master (which it is simply impossible to falsify, in addition each user has his own mental smailed-codes to launch it – a set of mental images, launching either the whole system, or separate programs). That is no one, except the master himself, just will not be able to use Information form someone else’s personal computer. Since volume and density of «unfolding» holograms will be possible to change at one’s discretion, it will allow users with all sensationally-mental completeness to sink into absolutely realistic virtual realities, being modeled by each of you at one’s discretion.

15.17787. Holographic keyboard will also be reduced in several times (and soon will disappear at all!) and visually will adds up to only a set of «buttons» for launching input commands. There will be no need in letters of an alphabet, because computer interface will be individually aiming only for mental interaction with its master. Operating memory will rise in hundreds of millions times, opening to creators of absolutely new models of quantum PCs practically unlimited possibilities: those tasks, for which implementation «now» many years are needed, it will be possible to solve just for several days! Each of you will be able to acquire for one’s PC such capacities, which will be equivalent to total capacity of computers nowadays existing on the whole planet. Just that very factor will allow scientists to start develop headlong all possible holographic directions not only to robotics technologies, genetic engineering and nanotechnologies, but also in a lot of spheres of their use in everyday life, including already known to you breadd-forms. In two-three decades will be accomplished very mighty and unprecedented up to now scientifically-technological revolution, allowing humankind confidently to enter next period of its development, which I would designate as a time of creative realization of «scientifically-spiritual slloogrentness».

15.17788. So, my dear, all your nowadays anxieties connected with losing weight, cellulite, all kinds of physiological and physical defects, mutations, injuries and diseases already in two decades will cease to be an object of your attention. Cardinal changes in direction of improvement and purposive correction of functions of your biological organisms will start to occur at first through replacement of lost, faulty or worn out organs on grown up near them from individual stem cells. Contemporary metal-plastic and ceramic prosthetics of the most important organs will become a thing of the past, while instead of them quite fast and reliable methodologies will be developed, allowing to carry out any improving interference in an organism by means of local DNA correction, activating genes of some areas and suppressing genes of other areas.

15.17789. “Medical treatment” in near “future” will be based in a greater degree on mentally-sensetional attitudes by means of purposive change of frequencies of vibrations of cells, systems and organs (wave modelling). Each of you with help of experts will be able not only to supervise functions of all systems and organs of your own organism, but also to model any of the external features in hand, including height, details of a figure and appearance forms, color of eyes, hair and so on. You will be able to change a HYY-BBY-Form as you thinks best at any time, to become a completely other “person” in outward appearance, but with those spiritual achievements, qualities, which will be peculiar to you at that moment. It reminds meditative processes more, which are carried out in Self-Consciousness of a “patient”, than present surgical, physiotherapeutic and medicamentous methods.

15.17790. We, all more intensively being refocused to more high-frequency energy-information Flows of Collective Intelligence of our Planetary Essence, promptly raising degree of our thinking and feeling quality, thereby we constantly change and improve not only Configurations of Forms of Self-Consciousnesses of Life surrounding us, but a quality of “our own” HYY-BBY-Forms as well. To replace earlier focused by Us HYY-BBY-Forms, every next moment of our Life new HYY-BBY-Configurations are being involved in process of Our multipolarizational refocusing, which – by BJOOOMOOT parameters – exceed our previous possibilities for better creative realizations more and more.

15.17791. The higher will become your biological body quality (that is degree of universalization of all cells and frequency of work of each of organs will begin to raise), the less HYY-BBY-Configurations of Forms of Self-Consciousnesses focused by You will structure slloogrently low-frequency diapasons of manifestation of “current” groups of three-four-dimensional Continuums which you subjectively perceive as “the World around”. Thus, you will be gradually refocus to the slloogrent dynamics of less «dense-plasmous» Form-Systems of Worlds, raising your realizational possibilities in an imperceptible for you way, and terms of use of biological bodies by you will become more and more long. In one of the next moments of your incessant “posthumous” refocusing when the quality of common focus dynamics of Form-Creators of your Self-Consciousness (FCA) will exceed certain biological HHAACMM parameters, you will be able consciously to perceive yourselves already in Forms of Self-Consciousnesses of 4-5-dimensional groups of Continuums, and the issue of technical or genetically-engineering prolongation of terms of existence of Forms focused by You will in general disappear forever.

15.17792. But, besides, you should never forget, that if your focus dynamics - in any of “points” of your subjective rezonation manifestation - will start to deepen steadily into realization of any selfish tendencies, than will occur a reorientation of your individual refocusing to Worlds where abilities to purposive virtual modelling of one’s own Form will consistently – as far as their quality deteriorates - decrease and, eventually, you will refocus again to Worlds of those rotation Cycles, where such technological and genetic possibilities for constant transformation of Forms focused by you and other your universal abilities are completely absent.

15.17793. Life constantly - and in the nearest years more and more rigidly and uncompromisingly - will start to establish for each of you certain limits of current choices quality, just which will define tendentiousness of the nearest stage of your subsequent refocusing: either you become more and more altruistic and highly-intellectual, gradually starting in a greater degree to realize yourself as a creatively active part of Forms of Self-Consciousnesses of New favorable Worlds with more harmonious interrelations in “human” society, or all of you will withdraw from this Direction of

development more and more, continuing, as before, to manifest yourself and conscious yourself in low qualitative groups of Continuums with extremely limited possibilities for high-frequency creative realisations, including the absence of your biological organism ability to self-restoration as well.

15.17794. Anyway, gradually one or another variants of this simultaneous multipolarizational process become a habitual norm of your everyday Life, what automatically leads to change of a qualitative state of quantum structure of Form-Creators of DNA of your biological bodies, and you naturally transform yourself from participants of inertial dynamics of “present” groups of Continuums to participants of Form-Systems of Worlds of other groups of Continuums. I repeat once again: the qualitative state and individual features of biological organisms of Forms of Self-Consciousnesses focused by you continuously change anyway, becoming either more perfect and universal (but unadaptable to manifest in disharmonious Continuums, and then “posthumous” refocusingings are carried out in the Direction of more rezonationess), or more rough and unhealthy (that is dissonant with more perfect Continuums, and then “posthumous” refocusingings promote Self-Consciousness deepening in protoform Directions).

15.17795. As soon as we will be able to be focused steadily in HYY-BBY-Configurations, already enough deeply synthesized by Aspects of two lluvvumic Dominants with high-frequency Aspects of Quality All-Unity, duvuyllerrtly will raise not only quality of «quantum geometry» of Space-Time inertially synthesized by us (at the expense of quality improvement of all our CΦYYPMM-Forms and Aspirations), but also properties of used by our Self-Consciousness Time Essences, structuring “future” groups of more favorable Continuums. Since per unit time we will be able to process consciously much more high-frequency Energy-Information, realisation rates of decisions made by us will incommensurably grow, as if the Space-Time will be “compressed”, will be “concentrated” (but will not be condensed inertially, and, on the contrary, will be “developed” even more, will become more “flexible” for psycho-mental manipulation!) will become more saturated energy-informationally, allowing people to achieve one’s aims much faster, than it occurs “now”. Time will acquire absolutely another mode of subjective reflection in our systems of Perception. Thanks to it all our life creative work will also become qualitatively other - more “internal”, consciously-collective and leaning not on individually-egoistical, but on high-spiritual, noble and cosmically-scale Purposes.

15.17796. And deep studying and development of bowels of the Moon becomes the first problem, solving of which will serve as powerful stimulus for development of scientific and technical base and consolidation of intellectual resources of all countries. And such “humans” activity, indicative of a high enough level of development, will inevitably cause an establishment of close contacts and various kinds of creative interrelations with other reasonable races and cosmic civilizations, whose representatives already many millenniums (and some - hundred thousand years!) regularly are present on the Moon at the same dimensions diapason and have there their own interests, having arranged under its surface their own production and technical bases and the scientific-research-centers.

15.17797. Being bellicose to manifestations of everything “extraterrestrial”, present “humankind” with its aggressively-insane doctrine of “cosmic wars of aggression» is as jet absolutely not ready to such bilateral contacts. That is why there are no such contacts in the meantime. More truly, they already exist hundreds millenniums (and have never stopped!), but that is only hopeless ignorance

of religious figures, incompetence of the powers that be and science officials do not allow to accept seriously profound Knowledge, transferred to people by a telepathic and intuitive way, and to use it profitably for the general development of the “humankind”.

15.17798. But humans of more favorable variants of our “future”, deprived of bodily fear of unknown and guided only by an «innocence presumption» towards any possible contacts with extraterrestrial or planetary (oceanic) Forms of Collective Intelligences, will be already ready to enter mutually advantageous community with any intelligent civilizations peacefully, without aggression, without self-superiority feeling and desire to enslave someone. In exchange for possibility to excavate some of mineral deposits as yet unknown to us ourselves (diamonds, precious and rare metals), we will get access not only to their ready-made bases, but also and to a major scientific and technical Information about absolutely new energy sources.

15.17799. That is what will become powerful stimulus for prompt perfection and development of earthly technologies in all directions, starting with development of close and distant Cosmos, and finishing with full satisfaction of our daily commercially-industrial and social needs. These “lunar” civilizations (while in fact very different in a Form representatives of extraterrestrial types of the Collective Intelligence, arrived from different systems of Stars of present vibrating diapason of the Universe) will help humans to understand to the deepest nicety different biochemical, biological, genetic and micro field quantum processes, thereby in practice confirming the Energy-Information stated in IISSIIDIOLOGY.

15.17800. In parallel with it in the nearest decades will start actively to manifest themselves and to establish friendly contacts with humans unknown to us in the meantime other earthly races, which already live for a long time in depths of oceans and seas, having formed there unique and very individual reasonable communities, in something similar to ours, and in something exclusively individual as well. There will appear a possibility to get from the sea environment a huge amount of various cheap raw materials, including chemical, industrial and food resources. Basically there will be various chemical compounds, material for light and processing industries, and also very rich with microcells food, allowing organizing harmonious and balanced nourishment. As for the products of an animal origin (meat), except fish, mollusks and plankton, they will soon cease to play so important role for our organism.

15.17801. During this period of active merge of overland and oceanic civilizations simple enough surgeries on implantation of artificially grown up synthetic «branchiform constructions» to all-comers will start to be performed, which will be located behind an ear in three lines in the form of thin longitudinal sections: the first will be stretched on 4 cm downwards from an ear center, the second one - just below the first and 7 cm long, the third one - the smallest - only 2 cm long. After that programmed nano-robots will transform cells of a body of anyone interested, so that enough of oxygen would be obtained in an organism directly from water for realization of normal live activity within 10-15 hours of being continuously under the water. Soon after it will be possible to reach better results by means of activation in certain chromosome regions of humans, who have decided to devote themselves to studying and development of oceanic depths, of those genes, which are responsible for functions of oxygen supply of an organisms of whales and dolphins. There will be many millions of such volunteers!

**15.17802.** In the huge depths of the ocean on plane surfaces huge stationary scientific-research centers with cupola-shaped transparent ultra-strong polymer ceramics coverings will be built. Tens thousands of experts in different directions of science and manufacture will be able to live and work in them for a long time simultaneously. Both enterprises for extraction and reprocessing of rare minerals and ground vegetation will be there. It will be much more expedient, than raw materials transportation on a land for processing. And on the surface of the seas and oceans itself thousands of floating cities-modules will ply slowly, in which will be able comfortably to live and fruitfully to work those of you, who will devote oneself to studying and development of water riches of the Earth. Each of such cities with population of tens thousands of humans will have its own specialization and its own course. Neither storms, nor tsunamis or tornadoes will be able to embarrass them, as the system of segment cupola-shaped hermetic encapsulation of all above water sites of the city and presence of powerful underwater base will make these modules absolutely impregnable even for the most powerful welters.

**15.17803.** All this will become necessary not only on the basis of expediency and creation of as much as possible comfortable conditions for those of humans, whose creative interests have moved towards a water-overland way of existence, but also for an establishment of closer scientific and technical interaction with oceanic races, only three of which are “humanlike”. By a structure of the upper half of their trunk one can say, that they are beings very similar to “humans”, which have the same head, shoulders, trunk, but there are various differences in a structure of fore limbs, eyes, ears, skin, hair coat and some systems - in particular, genitals.

**15.17804.** All these differences, existing between us and them, are a result of both purposive and natural gene mutations, which have occurred in biological organisms owing to long existence in different habitats. And as their DNA differs very much now from “human” one, reproduction of joint progeny (naturally) will not be possible. But by means of achievements in gene engineering diverse amount of gill-breathing «ichthyanders» - both overland and in water - soon will appear, whose genomes will become an embodiment of all of the best and useful, that is characteristic both of us, and of them.

**15.17805.** Representatives of other races – it is not exactly what many of you can somehow imagine at present, and their appearance is far from “human”. All variety of their forms can be compared approximately to such sea inhabitants known to us, as whales, dolphins and huge octopuses. Among them there are four more reserved races with an obvious bias in such type of creative work, which we subjectively would interpret as varying degree of rationalism. Each of these races prefers to live separately from others in depths of warm seas and oceans, therefore relations between them (and also with people) are regimented as well. It must be noted that in time these deep-water races will very strongly suffer and decrease quantitatively as a result of the most powerful local earthquakes, which will occur in areas of their habitation. In more favorable Continuums only those of them will survive, whose Configurations will be potentially ready to close consolidation with other developed civilizations.

**15.17806.** Reorientation of Self-Consciousnesses of some quantity of “humans” in the oceanic direction of life creativity will occur not at once - in the beginning it will be a diplomatic enough and ambiguous process, in which it is going to be formation of some stiffness and mistrust between humans and other oceanic races. Living under ices of Antarctic and Arctic regions “humanlike” civilizations are vitally interrelated with each other by a common biological environment and joint

survival systems - actually it is the very old civilized union of highly developed essences, based a few hundreds millenniums ago by races, which had lived on the Earth during “the antediluvian” period. Part of them then had went out again in different places of a territory of formed continents and had to adapt to new conditions in one’s own way, while the great bulk had continued to develop and be improved in inaccessible depths of oceans.

15.17807. As their life interests had practically nothing in common, in time contacts between representatives of above-water and under-water civilizations have completely stopped and could recommence only when the Self-Consciousness of humans has reached a level of development, necessary for an establishment of creative mutual understanding, as their and our svilgs-spherational Synthesis sub-schemes (of the same Dominants!) – are different. But an essential difference in Conceptions will not hinder forming of united creative union by improved earthly “humankind” and three oceanic “humanlike” civilizations in more remote “future”.

15.17808. Such partial creative merge of “humankind” with oceanic civilizations and races will occur because of sharply intensified process of ocean level rising and absorption by water of the majority of the overland territory (whole countries and islands, megacities, towns and settlements, woods and agricultural lands, material and technical values and production-raw capacities), what will force the rest of “humans” to pay the most serious attention to possibilities of development of waters. And to realize such sweeping and grandiose designs there is no way one can do without attraction of the most developed of «ocean-men» and «see-men» to joint scientific researches and genetic experiments.

15.17809. In some of development scenarios the most important condition for such commonwealth will become to go through an obligatory procedure of wave deactivation in DNA of genes of aggression by all participants of creative consolidation that is *partial* suppression of those genes, which intensify process of attraction to “unpackings” in Self-Consciousness of low-frequency CΦYYPMM-Forms. Completely to exclude their functional activity in genome it is impossible *in the meantime*, because they are also involved in work of immune system and in a lot of other biological processes. In normal state the same adrenaline gives us a possibility to exist in a physical body and to perform a physical work. But when Synthesis of the lowest Levels of first two centers will come to the end, a process of deactivation of any manifestations of people’s aggression (destructive CΦYYPMM-Forms) will naturally happen.

15.17810. As I have already mentioned, all these processes will begin on the Earth in the nearest two decades (this - in more favorable scenarios of development, and in order of quality decrease of a common focusing of Collective Consciousness they will move away more and more in different «time loops» and will gain more and more destructive forms of manifestation) and will get accelerated development in subsequent groups of Continuums, even more deeply opening synthetic (creative) possibilities of Iluuvvumic Direction. That is in less qualitative scenarios nothing of what I am trying to tell you here, either will not ever come, or it will be able to occur in some other variants only in hundreds or even in thousand years’ time, - it all depends on a type of protoform directivity of your refocusings and their quality.

*Whether other space civilizations and races, which you have mentioned, will experience Aspects of other Pure Space Qualities?*

15.17811. - Forms of Collective Self-Consciousnesses of two oceanic civilizations - arctic and antarctic – are developing in accordance to the same scheme of Synthesis, in accordance to which nowadays focused by us HYY-BBY-Form-Types are developing, that is with dominance in focus dynamics of Self-Consciousnesses of Form-Creators of hvasslons of ALL-Love-ALL-Wisdom and ALL-Will-of-ALL-Intelligence, but in accordance to other svilgs-spherational sub-schemes, which define inertial sequence of energy-information interaction between all participants of background Synthesis! The third civilization – the atlantic one - is busy with the Synthesis of Aspects of Qualities ALL-Will-of-ALL-Intelligence and ALL-Abundance-ALL-Fullness (which is one of six objectively compatible energy-information “analogues” of the Quality ALL-Love-ALL-Wisdom).

15.17812. Yes, major CΦYYPMM-Forms, which are being synthesized by ours and their Forms of Self-Consciousnesses, in a more qualitative diapason of our “future” joint manifestations differ from one another in a varying degree, but nevertheless by communication all of us comfortably enough socialize and understand each other, because by that time we will already have deeply enough experienced medium- and high-frequency Aspects of the common for us and them (with the arctic and the antarctic civilizations) Quality - ALL-Unity, and two Dominants of the atlantic civilisation also will have already sufficiently synthesized Aspects of the third Quality - ALL-Integrity, which is being objectively compatible energy-information “analogue” of the Quality ALL-Unity. And as for four other oceanic races, as far as I managed to understand it, three of them are busy with the Synthesis scheme of Aspects of ALL-Love–ALL-Wisdom and ALL-Knowledge-ALL-Informedness Qualities, and one – of Aspects of Qualities ALL-Love–ALL-Wisdom and ALL-Essentiality-ALL-Permeability.

15.17813. As you can see, Aspects of one of two Dominants, peculiar to us, are also synthesized in functional schemes of manifestation of their Forms of Self-Consciousnesses. Besides, synthesized by us and them Aspects of third Dominants also are objectively compatible with each other (that is can be accessible to us by meaning). Thanks to presence in yours and their systems of Perception of CΦYYPMM-Forms, reflecting specific properties of identical Aspects of Qualities, you will be able to come to an understanding during communication with them. Your “present” logic, extremely discrete, bellicose and limited with ignorant egoism, prevents you from entering bilateral and productive contact with more developed civilizations, because you would not be able to understand them by means of primitive-archaic Conceptions of your own “present” Forms of Self-Consciousness anyway. Thanks to their full replacement by universal Conceptions, peculiar to IISSIIDIOLOGY, you will be able quickly enough to replace “present” groups of Continuums with more perfect, and then that all, that present in our Reality a reflection of higher vibrations of Aspects of the Quality ALL-Unity, will give you a possibility of reasonable communication with whose ones, who has either very developed Aspects of this Quality, or these Forms of Self-Consciousnesses evolutionally aspire to it as well, synthesising Aspects of some other Pure Qualities in the meantime.

15.17814. Presence in structures of Self-Consciousness of Creative Activity of the same Conceptions will allow you to use the same Levels of Energy-Plasma because any CΦYYPMM-Form is relevant to dynamics of some of Pure Space Qualities as well. Your present Conception of «associative thinking» is not absolutely true. For example, it is possible to weave linen made of floss, and it is possible to weave it made of flax as well, though it will be rougher. And still it can be made of a wire

or a straw, but it cannot be applied for the same purposes, as silk one can be applied for, though both to one and to another, applying a principle of mechanical creation, CΦYYPMM-Forms about “linen” are applicable.

15.17815. That is the same way how matters stand with various self-conscious Elements, which structure different Levels of Energy-Plasma («emanations», «psychonations» and «karmonations»). From all infinite number of being formed by them Configurations only those of them are available for creative use by Form-creators of your Forms of Self-Consciousness, with which you are able consciously to manipulate in your Imagination (that is only within a set of CΦYYPMM-Forms from your individual ODS). Other Forms of “you”, which belong to other civilizations, use the same “psychonations” and “emanations”, but the ones that reflect Aspects of other Qualities, and therefore if you do not have the common synthesized Qualities with them, you simply will not be able to use CΦYYPMM-Forms peculiar to them.

15.17816. Therefore a great many civilizations did not come and are not coming into a contact with you so far, owing to that there is no intellectually-sensational basis for mutual communication and associative understanding (without words). But thanks to the technological achievements, which our scientists will invent real soon now, by means of «extraterrestrial» technologies, these communication difficulties and barriers in dialogue will be easily overcome. Will be created such sound-replicators, which will allow you to communicate easily at the level of a transformation of generated by someone Thoughts to associative form-images, adapted to specificity of your Self-Consciousness. This principle of communication will be based upon a “field” decoding of all mental-sensationally potential, peculiar to humans, and upon an attunement of “another’s” CΦYYPMM-Forms with their own subjective Conceptions of something.

15.17817. And on the contrary, that, what you will imagine during communication with someone, will be transformed to CΦYYPMM-Forms, corresponding to specificity of their Self-Consciousnesses and will become accessible to their understanding. In the beginning such devices (“teta-correctors”) will appear, which will be able directly to translate your words in Thought and vice versa, but it will still seem difficult enough and inconvenient for communication, because will still remain great language barrier. Then special sensors to read Thoughts, placed in a temporal part of a head, begin to be used. Sounds and words said by someone thus can remain incomprehensible to you, but it will be absolutely clear to you, what’s it all about. To replace it «holographic modulators», pocket «transtoyers» and wrist «mentimers» will quickly come, which will considerably facilitate mutual understanding between different-qualitative Forms of Self-Consciousnesses. In general, all nuances of intercivilizing communication will be studied and improved, and it all will take much less time, than it seems to you.

15.17818. An adoption of various technological innovations will be a bit longer, but it will be a jump as well, about which neither scientists, nor economists, nor sociologists, nor politicians now have no idea at all. Nobody knows about these prospects, because due to your thinking inertia you can only assume that soon something will occur, but absolutely do not imagine, how all it will be. And it will happen so quickly and unexpectedly, that many of you, then mentally looking back at the nearest “past”, will be surprised very much at their Life changes. It is difficult even to imagine, to what new stage of your eternal Existence you are already entering now, though subjectively it seems to you that nothing special happens round you, everything continues to follow its customary routine, in a former and already become habitual to you (but actually - in being furious speed up!) rhythm.

15.17819. But in no case do not think, do not guess and do not estimate, which one of “humans” of your environment, more than others, is worthy to be manifested in qualitative Worlds, and which one, in your subjective opinion, should unambiguously refocus to Continuums more corresponding to him and stop, at last, “preventing others normally to live and spiritually to develop”! Constantly maintaining such a critical-condemning position towards destructive (only in your Perception!) influences of circumstances of an external world, you automatically will doom yourselves to manifestations with less qualitative “personalities” in more and more unfavourable scenarios. Only high-altruistic aspiration spiritually and morally to help each “human” - whether it is a bam or a vagabond, a gangster or an extremist, a corrupt official or a cardsharp - will give the chance to you to be focused steadily in a more qualitative individual Worlds. After all neither of you never knows for sure, what “human” around you represents. You do not know his Way, do not know, what Experience he has gained at the moment of his Life and what background svilgs-spherations are being carrying out now, that, having passed through a chain of necessary “death” refocusingings, start to realise himself in much more qualitative creative manifestations.

***QUESTION. How the economy in more qualitative Worlds will be organized? How people will earn money and whether there will be money in general?***

15.17820. - Let’s define once again, that try to describe at least the scantiest part of different-qualitative scenarios, equally possible in ours with yours “future”, would be for my part plain stupidly and useless. Besides it is necessary do not forget, that the fact of your possession any concrete Energy-Information by itself- at the expense of scrupulous thinking about it and careful “digestion” - is equal to your real acquirement of the certain Experience, included in CΦYYPMM-Forms used by you, that can already of itself essentially amend a participation of Form-Creators of your Self-Consciousness in a subsequent process of your multipolarizational refocusingings: it is simply useless for you once again fully to live through what you partly have already experienced, thought about, realized - that is, synthesized.

15.17821. Therefore an energy-information component of the scenarios, being consistently focused by you in “the future”, will change greater or less in lots of those details, which are of no importance for you any more, as the fact of your preliminary possession the certain Energy-Information about “it” for this your Form of Self-Consciousness itself has excluded a great number of choices which would be possible, if you did not know about all this. It does not mean at all that present events will not happen at all or this circumstance will somewhere disappear: through lots of some scenarios they already initially structure inertial dynamics of your Stereo-Form in some of slloogrent Space-Time areas - “there”, where you did not know anything about it. In other cases - depending on quality of sequence of your elections! - they will be carried out in your Life either a little differently, or completely in another way. That is the algorithm of ours with yours simultaneous energy-information interrelations with “the past” and “the future”.

15.17822. This reminder for my part is necessary to exclude incomprehension between us, which can lead you to mistrust of that Energy-Information, which I am trying to put down in my books: as much as to say, you know, Oris, but everything have happened not as you described! My dear, never forget, that true Reasons of everything that occurs to you, always it is necessary to search not somewhere outside, but in yourselves, in subjective features of your reactions and choices, as far

as your incomprehension of something (or someone) always arises only from your own ignorance and lack of knowledge of those elementary Principles, on which Form-Systems of Worlds of groups of Continuums slloogrently surrounding you (and so, focus dynamics of all Forms of Self-Consciousnesses, structuring these groups, as well) are being inertially organized. Literally each of your current decisions is of essential significance to rates of movement to Aims laid down by you, as far as instantaneously and in its own way corrects in skrruullerrt system the whole “picture” of svilgs-spherational dynamics towards to concrete focus dynamics of that Form of Self-Consciousness, which You - as Form-Creators! - use at present for certain creative realisation.

15.17823. So, everything, absolutely everything in your Life depends on that, how much qualitative and stable refocusing in this Direction you carry out, that is, exactly what qualitative basis of your “future” existence you - unconsciously, intuitively or consciously - choose in the course of your own *moment-by-moment* life creative work. Once again I want to focus your attention on that a moment of making decision by you occurs much earlier, than you subjectively feel it is. All that is being carried out approximately as follows: in the beginning in Self-Consciousness are being activated hvasslonic Form-Creators of that brain area, which is connected with more high-frequency operations of planning, on structure and activity of which depends a choice of concrete svilgs-spherations, that provides focus dynamics of Self-Consciousness with missing energy-information interrelations, necessary for Synthesis of an Experience, which is being multipolarizational taken of a present situation.

15.17824. Actually exactly here - *instantaneously!* – the decision is made and the concrete choice of the further Direction of refocusing is carried out. The rest «considering time» - it is the inertial component, “painted” with CΦYUPPMM-Forms of individual subjectivity of “personality”. Further hvasslonic Form-Creators send their conclusion to bio-Creators, which are responsible for sensual integration, and you start to “project” on this *intuitively* made decision those Conceptions, which already are available in your individual ODS, that is you start to experience emotionally, consciously to weigh all pros and cons, though actually the decision already is *objectively* made by “you” - on a basis of HHAACCMM-parameters of that Form of Self-Consciousness, in which You are focused at present! Therefore, just when it seems to you, that you still are actively thinking and analyzing a situation, trying to be defined with the choice, the most part of work is already executed by hvasslons, and the decision which is absolutely corresponding your current HHAACCMM, it is definitively made by them.

15.17825. Therefore, possibilities of realisation of your requirements under continuously changing conditions of Form-Systems of Worlds surrounding you directly depend on degree of the Energy-Plasma quality, which is being synthesized by Form-Creators of your Self-Consciousness, which is on energy-information filling HYV-BBY-Configurations focused by You. Only through this objective “mechanism”, that operates your system of Perception, you will be able really to change subjective Conceptions of your environment. This is, as a matter of fact, that - one and only! - “tool”, by means of what all simultaneous dynamics of your subjective inertial “transformations” in Space-Time is carried out.

15.17826. I conditionally define this “mechanism” as UCF - Universal Self-Consciousness Focus of that “personality”, with Form-Creators of which you subjectively identify «yourselves» during each present moment of your own eternal Existence. That is to be conscious of “yourself” as of certain “personality” you can only by means of the focus dynamics, by singling out its HYV-BBY-Configuration

from all multitude of variants of other your Interpretations owing to the certain specificity of Sphere of Interests inherent only to its HHAACCMM Form-Creators. All the rest, including any of decisions mentally made by “you” and mentally experienced states, - automatically and moment-by-moment! - is carried out by hvasslons of two lluuvvumic Dominants on the basis of countless qualitative parameters of Focus of Creative Activity of Form-Creators (that is their synthesis degree in different sublevels of Self-Consciousness) of the HУУ-BBY-Configuration chosen by you.

15.17827. CФУУРРММ-Forms, which do not correspond to new, more qualitative frequency parameters, inevitably will have to disappear quickly enough from creative dynamics of “future humankind», have given a place to more perfect and harmonized Configurations. The general foundation of Spirituality and the Science, Philosophy and Culture, the Politics and Economics of New Worlds is entirely build only on unconditional True of Unity of Everything and impossibility of division of creative dynamics of all Forms of Self-Consciousnesses in principle. “Future”, more favorable for your Existence, variants of Form-Systems of Worlds and Continuums will be able rezonationally to be manifested as a reality surrounding you only when with their qualitative parameters high-frequency CФУУРРММ-Forms of lluuvvumic Direction, which are being stably realized through mental-sensationally creativity of Form-Creators of АИГЛЛИЛЛИАА- and ОРЛААКТОР-Ииссииди, structuring your Self-Consciousness, will achieve harmony.

15.17828. It cannot be otherwise! Any space-time structure is a “quantum” continuation and inertial reflection of creative dynamics of Form-Creators of your Self-Consciousness. Thus, focus dynamics of your Self-Consciousness becomes not only the main organizing principle of all your life creativity, but also the main actualizer of those specific conditions, in which this creativity will be able to be carried out. Actually, there is no essential difference between inertial dynamics of “that”, what in reality represents all totality of qualitative manifestations peculiar to Form-Creators of your Self-Consciousness, and quality of Forms of Self-Consciousnesses surrounding you: your subjective associative states and psycho-mental reactions find their own rezonation reflection in qualitative dynamics of Forms surrounding you.

15.17829. Now a level of quality of FCA-dynamics of Self-Consciousness of the majority of you represent beings though already reasonable enough, but nevertheless still to a large extent highly and highly ignorant, narrow-minded and selfish, that is not quite civilized. You are often absolutely inadequate in reactions and unpredictable in decisions, as CФУУРРММ-Forms of feebly-synthesized low-frequency Levels of your Forms of Self-Consciousnesses actively convince you that it is necessary to you from someone or from something to be protected, as the world around is always hostile, aggressive and dangerous to you. You do not understand that as true sources of any aggression and danger to you your own negative thinking and your destructive, aggressive and detrimental mentality serve.

15.17830. So while just in that the very primitive way you yourself are being involved only in those groups of Continuums (from all simultaneously-multipolarized focus dynamics of your Forms of Self-Consciousnesses) which are rather far even from the most modest Conceptions of perfection, as meanwhile you tirelessly create your worthless and shabby Worlds by means of just the same mean and selfish Conceptions. Living conditions of all Forms of Collective Intelligences rezonationally correspond to those types of the Energy-Information, by means of which these Forms of Self-Consciousnesses can be manifested in inertial dynamics of Space-Time. Therefore enmity, division and egoism peculiar to you are manifested in the World surrounding you, in relations, which you

have built by yourself. All your economics is hostile and aggressive, ruthless and cynical towards to each member of a society. Any government of any country always is hostile and aggressive towards to any “personality”, who does not represent any practical value for it, as well.

15.17831. Development of any Idea of separateness of Forms of Self-Consciousnesses with a United Whole would generate in energy-information structures of a new human formation low-frequency tensor states, thereby deepening duality and destruction, which rezonationally will involve, if they will not be accordingly annihilated, in present Continuums low-frequency  $C\Phi YUPMM$ -Forms similar to them, that greater and more deeply disbalance the present system on the whole. Chaos and destruction your present, limited by egoism, existence is just the main reason of that you, in low-qualitative levels of your thinking, feeling and actions completely ignore an obvious Postulate of the Truth - basic indivisibility of the all system that provides all your psychobiological existence, - thereby aggressively and persistently opposing your focus dynamics to all balanced energy-information Flow.

15.17832. In your petty and chimeric Worlds there are only mercenary interests of certain groups of “humans”, united with one another by insatiable thirst for making the greatest individual gains from rapid grip on power in corruption. Therefore their political and economic interests are not attached in any way to essential interests and problems of billions other members of a society. On a basis of communications and “personal” interests, concerning to a certain territory, they realise their ambitions, but say that they act for a good cause of their own native land, people, country, constitution and so on. When you deeply and impartially will analyse the situation, in which you are now, you will understand that an animal nature and an impulsive instinctivity, you manifest in the Life, are not worthy of better living conditions, as all these your lowest creative manifestations could not be realised in full measure.

15.17833. Even if now, in present conditions of critical level of egoism and low-qualitative activity of Focuses of your Self-Consciousnesses, to give you unlimited possibilities for receiving all kinds of material benefits plentifully, all the same more than half of you will continue instinctively to save, to stock up, to shovel and to let rot all this good - simply by consciousness of the possibility to realize oneself exactly in that. Therefore economics and politics of the World surrounding you completely correspond to the level of qualities collectively manifested by you: egoism, ignorance, aggressiveness and inspirituality. If focus dynamics of your Self-Consciousness will steadily change for the better and become more altruistic, laws of the reality surrounding you will gradually change as well, not only you will be transformed qualitatively, but also all other Forms of Self-Consciousnesses! The farther, more radical and more deeply it will take place, the faster - is strict according to rates of your internal transformations - will change the goodness of Form-Systems of Worlds focused by you.

15.17834. In your subjective Perception such “perturbations” within the common focus dynamics look like mass loss of life of “humans”. And if in Directions of more qualitative variants of ours and yours “future” less developed Forms of Self-Consciousnesses actively “die”, in less qualitative Continuums, where  $HVY-BBY$ -Configurations of same “humans” are more harmoniously “interwoven” in destructive scenarios, they continue to live, while best of “humans” in great numbers “die”, whose high-frequency focus dynamics considerably discords with low-frequency Levels of Creative Activity of Collective Self-Consciousness of “humankind” of more primitive Form-Systems of Worlds. Individual possibilities to be or not to be the real participant of various global cataclysms and of other large-scale planetary collisions represent only naturally determined

results of your subjective refocusing: those Forms of Self-Consciousnesses, whose life creativity does not correspond any more to the most active CΦYYPMM-Forms, structuring present groups of Continuums, refocus to Existence conditions, which are more resonation with their Configurations.

15.17835. Applying all your internal (psychomental) efforts to make constantly only as more as possible the most qualitative choices, you thereby automatically refocus to more and more favorable conditions for manifestation of CΦYYPMM-Forms of nowadays peculiar to you Levels of life creativity. And in “future” Continuums, where quality of universal “interpersonal” relations closely approaching the main lluuvvumic features (high-intelligent Altruism and high-feeling Intellect), science and technologies become so advanced and perfect, that necessity not only for any material accumulations, but also and for any - monetary, barter - payments for the made work will naturally disappear in a society.

15.17836. As a result of that all people, irrespective of their traditional religions, being inspired with depth of iissiidiological Knowledge, will begin to aspire sincerely only to positive interchange and active creative cooperation (not for the sake of awards and a recognition, but owing to powerful internal needs for such realisations!), global and large-scale reunion of all spiritually aspired humans will begin on the Planet, that eventually will inevitably lead the human society to the necessity of formation in the near “future” of an united world type of a statehood, which is not divided with neither religious, nor national, neither economic, nor territorial or any other selfish interests.

15.17837. More perfect and fair laws, which will not ignore needs of any member of a society, will be created and implemented in an everyday life. The most important thing - possibility of creative self-realization in a desirable Direction for the purpose to be of the greatest use to all community – will be put in the forefront of the conscious eternal Existence of humans. Imagine everybody on the Earth will think and act only as it became habitual and natural to act on Ayfaar! Millions farfetched and generated by egoism problems of the society will disappear in themselves at once only owing to goodness increase of “interpersonal” relations!

15.17838. Therefore the whole structure of communication-public interrelations and society laws in such Continuums will be completely subordinated to interests of those “persons”, who consciously aspire to spiritually-intellectual self-improvement. Programs of creative development in directions of all kinds of science, art, culture will be created. The large quantity of form-creating manipulations with photons will be carried out, unique varieties of “an intelligent matter» in geneplasma and in gene engineering, in cyber-genetics and in cyber-bionics, in astrobiology and in quantum-modeling will be created. All kinds of the most interesting branches, existence of which you cannot even imagine now, will appear. Increasing of the nature reaches - woods and fields, lakes and rivers, seas and oceans - and an efficient consumption of existing resources will become the higher-priority in process of development of the “future” humankind. Therefore the need for wildlife preservation from barbarous destruction and thoughtless extermination will disappear - all necessary, including an electrical energy and many foodstuffs, will be extracted and be made basically from water and air, and also from waste products.

15.17839. Thanks to the powerful positive changes, which have occurred in focus dynamics of Collective Self-Consciousness, “the future” humankind will actively get involved in technological projects, which are carried out by other space civilizations on Mars, Venus and even on Saturn. These grandiose possibilities will appear in the long term of our development as result of that at

first we ourselves will learn to make every possible materials from polymers, to create «rational matter», to model our «dense-plasma» Forms not only holographically, from light quanta, but also from water and air. Almost all necessary will be made from man-made materials, polymers and chromomers (that is which actively change their own properties in certain time intervals). On completely automated fields will be harvested 2-3 high-quality grain crops (wheat, rice, buck-wheat, bean and others), whose sizes in 2-3 times will exceed their present forms. In cold latitudes on hundreds of thousands hectares of the automated hothouses already habitual, as well as unimaginable for you for the present kinds of vegetables and fruit, in tens of times (!) exceeding on productivity present-day ones, year-round will ripen. Concurrently fruit and vegetables, as well as any other food, will be possible to receive by means of industrial and house quantum replicators.

15.17840. Metal will be used only in some industrial and scientific process equipment, for example, when creating high-accuracy devices and space technology. In electric personal vehicles it will be completely replaced with the ultra-strong and superlight polymeric materials which can easily be reprocessed. In architecture also will appear a lot of interesting things thanks to new building capabilities and absolutely new «light-derived» materials, combining strength of metals and softness of silk.

15.17841. In an area of several dozen square kilometers hugest commercial and public establishments will be under construction - «dense-plasma» holographic trans-markets, which very quickly can be transformed to anything different. They will be situated under transparent domes with the most beautiful superstructures, with a lot of levels of towering one another transparent and light floors. Easily and quickly to move in them it will be possible not only by means of countless escalators, but also with help of silent panel devices on an air battery-powered cushion, which can be easily (like magnets) attached to shoe sole, - as soon as you will leave territory of a grocery or industrial hall (concept “shop” will disappear from a lexicon), these small sockets will fall off your feet themselves and will automatically be drawn on their former place.

15.17842. All this will exist thanks to new technologies and possibilities of materialization. One of building mechanisms in the “future”, for example, is interesting enough. The process itself is similar to how a spider spins its web. At first builders make foundation of a necessary configuration, set guiding lines of light-polymer fibers on it, and after that along these fibers start up robots, in design of which a program and a mechanism of “weaving” are enclosed. These robots, operated by a computer, moving quickly-quickly along the certain trajectory and leaving behind hardly appreciable trace, cover necessary spaces, limited by guiding lines, with very thin and transparent vitreous material. Like this, literally in several hours, huge territories of premises turn into high domes with necessary quantity of interfloor ceiling with already ready-made partitions. Thus the powerful reinforced constructions turn out, which are capable to endure incredible loads - for example, even falling of meteorites or small planes (in case of accident). Such work practically does not demand any labour and material cost, because robots make a building liquid in themselves from air, light and polymeric materials, which continually squeeze in them under huge pressure.

15.17843. Also elevating and levitating constructions will appear, which, being formed in certain interrelation of planes to each other (like sophisticated mutually crossed «fractalities»), will be able to create stable anti-gravitational effects round themselves. And if similar «fractal» constructions to assemble in the form of big planes, objects placed on them practically will lose their weight (earth gravity, depending on a construction, will be dispersed along “fractals” edges and either it will

be neutralized, or considerably reduced), that will give a possibility to manipulate huge weights, without particular effort moving them over any distances. If to form a framework of a spaceship of any size from such “honeycombs”, it will be possible to set its speed approaching 300 km/s, and being able to carry out maneuvers of any complexity as well. This opening alone, in a combination with means of a radical rejuvenation of a biological organism already invented by then, will become a powerful stimulus for an era of mass space travels to start.

15.17844. Tell me, for example, who now can imagine Life without a mobile phone? And after all they have appeared only about twenty years ago. At that time for billions “humans” it was such an unimaginable luxury, which could afford only very rich! But before their appearance we even could not imagine, how, being anywhere, at any distance at any time it is possible to communicate with each other. Now without a mobile phone in a pocket you will not even sit down at the table to eat! And on «skype» it is already possible easily to get in touch with subscriber visually as well. In exactly the same way ability to “fly”, more truly, to levitate, will become a habit as well, what I already mentioned above. At first it will be possible to carry out by means of every possible types - public and personal - «levicars» (for a few passengers), «graviskates» and «levitorons» (individual grounds). They will be small, very thin and easy (like bathroom scales for weighing) and made of an ultrastrong material (but not a metal).

15.17845. How these flights will look? Very simply! You put your both feet on a platform, take out from a small aperture in it a folding wheel- “joystick” (like a skateboard wheel), fix it vertically and start to operate a flight with its help: turning the handle on the right (as to gain speed of motorcycle), you slowly rise, on the left - fly forward horizontally, pull the right handle - slowly sink. It is absolutely impossible to fall or turn over accidentally. And the choice of directions is carried out by rotation of both handles of “joystick” - to the right, to the left, forward, backwards. Speed of flight changes depending on force of pressing of a toe (faster) or heel (more slowly) on a necessary part of the platform. Everything is very simple, reliable and effective! None jet thrust and other heavy and bulky devices, with help of which already now it is possible to make short individual flights (by the way, such personal reactive knapsacks will not become widespread in the “future” because of unreliable safety system).

15.17846. And in time it will become possible to do the same without any sophisticated devices and appliances. The point is that in our DNA certain genes are responsible for development of abilities to the levitation (along the line of Synthesis of Aspects of Quality ALL-Love-ALL-Wisdom, which is common dominant both for us and for flying Proto-Forms - birds, insects and so on). When this gene will be revealed by scientists, only insignificant genotype adjustment will allow to any interested, even to a child, to acquire these remarkable abilities. It in large quantities will start to occur concurrently with other tendency, which have spontaneously occurred to millions other humans, - to do genetic adjustments for development of water spaces of our Planet. Will be also such who, along with levitating abilities, will want to have increased possibilities to stay in water for a long time as well. For this purpose there will be no restrictions as well, as everyone is free to choose everything for creative realizations, at his or her convenience.

### *What art forms will be priority in more qualitative Worlds?*

15.17847. - In the fine art the nearest revolutionary bound, which is stretched before us, – is a holography. The holography will affect everything, and, first of all, cinema, painting, mass-media, Internet resources. Holog-users will appear - artists who will create by means of not oil and paints, but by means of computer programs, which manipulate holographic beams. Appropriate devices it will be possible to find in specialized departments of any supermarket. Each of you, if you like, can use them, having installed on a computer a program of sequence of interactions realization between beam flows. Such contemporary art forms as handicrafts and trades, will gradually turn into a hobby, and then will disappear at all, remained only as training programs. It will occur due to various reasons, among those there will be also a change of our general attitude to live Nature - as I was saying, it will become more thoughtful, responsible and rational.

15.17848. As a type of high-feeling communication excellent songs and classical music will sound. But at the expense of new musical instruments use this art will reach a much higher performance level. During a long time, within almost 25 years (and it is a huge term for such a dense-informational flow!) Ayfaar Songs, a quantity of which will exceed several thousands, will be popular. These Songs will be able to be reproduced by way of a certain «heavenly symphony», and voices, which sing out them (by the way, being simulated on a computer as well), will be amazingly harmonious, high and pure. But at first a general attention of “humans” will be attracted by their thoughtful texts because these Songs will begin to be sung out by many well-known variety performers. When “humans” will understand that by means of Ayfaar Songs it is possible spiritually to express oneself more fully and deeply (as generated by them psychical energies will powerfully activate in Self-Consciousness only high-frequency focus dynamics), then they will become much in demand.

15.17849. Such type of music as rock, rap and suchlike, will sink into “past” Worlds and already will never come back. In lluvvumic Direction of development of Collective Self-Consciousness CФУУРММ-Forms, modeled by them, cannot be realized at all. Punks, heavy metal musicians and their fans, rockers will remain in Continuums, which have exposed to powerful natural catastrophes. There “humans” will start to struggle fiercely for a survival, uniting for this purpose in certain social structures (up to gangster), to which passion for similar genres is peculiar.

15.17850. In Worlds of our “future” there will remain such art form, as dances, but with elements of an acrobatic levitation and gymnastics. At the expense of that a scene will represent a levitating complex, it will be possible to expand and enrich much more a performance expressiveness of visual perception, to perfect technique and plasticity, extremely to improve ballet and rhythmic gymnastics. At theatres, which will become much more realistic and therefore more popular, than now, all scenery will be replaced with holographic ones. All programs on holography will be on sale and dispensing in shops. With their help it will be possible to arrange any premise, for example, to form by your own a “bit” of wood, of a lawn, of a field, of an ocean at one’s own home. And yet birches will swing from a breath of wind, created by means of ventilating devises, clouds will occasionally gather on the sun, on the ceiling the depths of the sky of stars will mysteriously beckon, and in your huge bedroom waves of ocean, that jaw from afar, will be exactly such height that you yourself want them to be.

15.17851. All this will look absolutely realistically and very impressively. For example, if a hologram at your window will represent a deep precipice with a view of the other shore, it looks so real that

you never risk taking a step in it. It will be possible to program the hologram in such a way that someone in the distance will be sitting in a boat, which is swimming along a river, and fishing. Or it will be possible to adjust your computer so that, lying in a bed, you will be able to observe flights of birds in the sky, and you will be surrounded with fragrant herbs with natural scents; or to enter into the program tourists passing by once a month - for this purpose it is just necessary to adjust the timer. The holography will become customary, it will enter each house and become simply sensational, improving and inspiring factor of not only your “personal”, but also of a public Life. More and more perfect elements of the beautiful will be created, and it will be possible to enjoy it as in reality, these will be not drawn things, but perceived as «a direct reality».

***QUESTION. Whether the real volume of a premise is an obstacle to a hologram? Whether it will be possible at one's own home to build in any hologram, for example, of a huge castle?***

15.17852. - In this question you might have some misunderstanding “now”, as in the meantime you are not able to imagine neither holographic possibilities of the “future”, nor principles of their manifestation. When I say about spatial unfolding of holographic objects, I have in mind only technologies, principles of visual manifestation of which are based on frequency not less than 180-200 shifts per second, that allows them to approximate enough in their density to characteristics of all other dense-material objects of the reality. The points is that when a quality of psycho-mental creativity of “humans” increase in common, a CCJYVJJIYCC-indicator of the future types of the Reality also will change inevitably, to be exact to decrease from present 300-360 “shifts” per second (the average value – is 328) to 200-300 “shifts”. I remind you that the CCJYVJJIYCC-indicator – these are those frequency characteristics, which provide any objects with possibility not simply to be visually perceived by us in present type of the subjective Reality, but also to gain individual weight and other dense-material properties.

15.17853. The Holography of most nearest “future” represents rather primitive variants of virtual manifestation in this regard, as a speed of “shots” change in a space will not exceed 30-70 “shifts” per second. This dynamics is extremely not enough to provide presence of all properties, characteristic to objects, which are manifested in the reality in the present slloogrent area of the Space-Time. It is possible to move freely through such holographic images, without feeling thus any tactile contacts. It is simply a kind of a “three-dimensional” cinema, being shown not on a flat screen, but in the space surrounding you. For its visual “unfolding” enough great volumes of the spherically closed spaces (several times bigger than “present” cinemas) are need, creating an illusion of that you yourself and action observed by you - seas and oceans, sky and mountains, woods and valleys – are on the open territory or in premise with any other sizes (ancient castles, huge halls, caves, underwater or space world and so on).

15.17854. And so, in the “future” there are both less high-speed holograms, allowing to gain though extremely realistic as well, but nevertheless only visual impressions (they are shown in special spherotheaters), and high-speed ones. Thus only FUA-dynamics of CΦYYPMM-Forms of an information space of your Self-Consciousness will change in a certain way, while you yourself will stay put, indoors. Everything that is going on around you will be accompanied with not only sound effects, but also with corresponding smells, dryness or humidity, gusts of wind or water splashes, cold or heat sensations, experiences of freshness or closeness, chill or heat. But all that will take

place in limited premises, in which special armchairs will play the most important role in creation of absolutely individual experiences and impressions of what is observed in the Self-Consciousness of each spectator. By means of certain programs they will be able to influence not only olfactory organs, but will have the tactual influence as well: suddenly to “pock” into proper places, simulating a blow or a push, to rotate in different directions during “flights”, to recline backwards or to hang with you «face down» during «falling» and the like.

15.17855. Areas and volumes corresponding to real sizes of high-speed holographic objects are need to place them, as they, having all signs of «dense-plasmousness», can «be encrusted” by you in the general inertial dynamics of all objects of the surrounding reality only temporarily. That is as long as a form-building generator (holoprojector) works, you can touch them, to caress one’s hand, to lean or to go right around, but it is simply impossible to budge them, to raise, to destroy, to take apart to pieces or to “eat”, as all sequence of dynamics carried out by them is implemented not in your individual World by means of your Self-Consciousness (as it really occurs in Life), but thanks to the certain program put in the holoprojector.

15.17856. More perfect holograms of ours slightly more distant “future” will combine both active elements of psycho-mental influence and high-speed holographic dynamics. It will allow you, being, for example, in your spherical house, partly to use «dense-plasma» objects of the hologram created by you as well (these are – all immovable furniture, invariable or periodically changing architecture of premises, a decor, wall panels and the like) and to enjoy the virtual views, which have been absolutely imperceptibly “built in” in the general environment (changing views outside windows, entourage of walls and ceilings and so on). All these will be possible to match and to build in any premise along with really functioning in it household goods and goods for comfort (work elements of a kitchen, a bedroom, a drawing room, a hall).

15.17857. Since the principle of purposive mental-feeling clexing of information space will be enclosed in a creation of individual holograms, everyone will be able to create them only for oneself, by means of stable fixing and specification in one’s own Imagination of those or that images, which will be possible to derive from a lot of special programs, made for any of requirements and interests, starting from space, nature and history, and finishing with highly-sexual themes, realisation in which for many “humans” will still remain actual. That is at first by means of your imagination you will form in a computer by the use of special devices all details of space you desire and of any dynamics performed in it, will create a special file, will install necessary to you «launch points» (for example, to active oneself only at your entering the present premise), will build the information necessary to you into «a quantum simulator», will turn on the initiator, the reflector, the projector and ... that’s all, it is ready! You will sit at home in a special armchair (or will get on a special round ground with hand-rails, capable to move under you in any direction of your feet movement) and as if in reality to participate in those actions, which you yourself have enclosed in the program. The same concerns also a creation of any programmed dynamics outside “windows” or walls.

15.17858. In a system of your visual perception a view for five and more kilometers can be opened: for example, when the moving platform under you inclines, you will get a sense of descent or lifting, and a breath of changing a direction wind will create special «climate-managers» programs and «conditioners». If your fantasies will be connected with water, you can “develop” all space in a pool specially equipped for these purposes, where not only waves and a storm, but also a rain, a hail and a snow will be simulated. Thus, you “enter” the hologram created by you only by means

of information space of your Self-Consciousness (by means of CΦYYPMM-Forms of individual ODS), and according as where go your feet on a moving platform under you, corresponding sites and episodes of the action invented by you will be developed in front of you. It is something like when you move in a computer game, new and new levels and possibilities open up in front of you.

15.17859. On the basis of such «fully-bundled» holograms will be created not only «spatial holographs» (the future generation of present TVs), but also excellent clear manuals – games, which train “humans” to make right choices. These programs will be constructed by a principle of deterioration of circumstances when choices are less qualitative. Thus all the time it will be necessary to search for the most altruistic choice. If you find it, you can rise on the next level. And a goal, for example, can be the following: as soon as possible to get in a concrete «City of Light and Knowledge», in one of numerous Ayfaars. And here you begin your way: you meet different “humans” that give diverse information. Depending on how you answer, what keywords and feelings do you find in yourself, different new ways are activating and next holograms are being formed round you, corresponding the quality of your choices. Such interesting new games will soon come instead of present “horror games”, “fights”, « shooter games» and «strip games”.

***QUESTION. What will be features of the Human of so-called «the Sixth Race»?***

15.17860. - Actually the esoteric concept «the Sixth human Race» is very relative and conditional. Taking into consideration Principles of slloogrentness and duvuyllerrtness of manifestation of all Forms of Self-Consciousnesses in Space-Time, it is possible to say, that nobody never will be able really to figure out and to define, how many types of “human”, human and lluuvvumic civilizations simultaneously structure the general multipolarizational dynamics of ΠΡΟΟΦΦ-ΡΡΥ Focuses at all infinity of their inertial subjective Existence in 3-4-dimensional groups of “human” Continuums. But sometimes I have to this term only because no other associating with the most qualitative Conceptions of the “future” human (without quotation marks) civilisation in a “present” state of Collective Self-Consciousness of “humans” simply does not exists.

15.17861. Can «indigo» generation represent some rudiments of those universal CΦYYPMM-Forms and abilities, which are characteristic for a state of “the Sixth Race»? Yes, it can. But thus it is necessary to consider the following important factors. At first, a natality of highly-developed «indigo» children in present Continuums meanwhile is still rather far from the absolute. Therefore rates of their mastering the more qualitative CΦYYPMM-Forms of the Reality, which is formed actively in Self-Consciousnesses of other “humans”, meanwhile leave much to be desired. Along with them, in the process of the present Reality manifestation continue to join also much less developed “human” Forms of Self-Consciousnesses, whose uncontrollable aggression and an ineradicable egocentrism should become that powerful de-structuring factor, which will allow the general focus dynamics of Collective Self-Consciousness of “humankind” in the nearest “future” to be differentiated to three basic qualitative states: evolutionary, medium-developed and involutional.

15.17862. Approximately into such Creative Flows it is possible conditionally to divide the focus dynamics which nowadays exist on the Planet, which has already approached the most extreme limits, admissible for joint coexistence of the most developed, medium-developed and undeveloped Forms of Self-Consciousnesses (according to criteria of presence or absence of lluuvvumic signs in

them!). Further such critical intensity of a tensor between so greatly different-qualitative and almost incompatible Conceptions (which are simultaneously generated by seven billions “humans”!) of the same problems in the same slloogrentness type of Space-Time simple cannot to be manifested, as it would break a Principle of Duvuyllerrtness of Everything. Therefore, already shortly we (each one – in one’s own individual World) inevitably will have to pass through specific decompositional stage of our inertial development, allowing each “personality” to carry out sub-chakram refocusing to those groups of “human” Continuums, the general focus dynamics of Forms of Self-Consciousnesses of which qualitatively in a greater degree reflects tendencies, which dominate in the individual focus dynamics of Form-Creators of your “personal” Self-Consciousness nowadays.

15.17863. Depending on quality of psycho-mental “connections” peculiar to you (in a greater degree high-frequency or low-frequency), you will become eyewitnesses and active participants of realisation of one or another Planetary Mechanisms, which provide similar qualitative “redistribution” of all population of the globe in groups of Continuums more corresponding to them. As I already noted, in more qualitative groups the quantity of medium-developed “humans” will decrease considerably, and the Forms of Self-Consciousnesses, which powerfully dissonant with lluuvvumic signs, will simply “die out” by different global reasons (i.e. they will refocus to more corresponding to them Continuums). In the most favorable variants of the “future” less than one third of all present population will remain. But for the reason that a percent of birth rate of «indigo» generation children will rise at once to absolute (100 %), the quality of Self-Consciousness of humans in future will not decrease any more, what will very quickly allow all those large-scale changes in our Existence to be carried out, which I already mentioned earlier. In general it will take as much time as it is need for full change of a «half-indigo» generation which will remain after only forthcoming qualitative “redistribution”.

15.17864. Children of present “indigo” and those of us, who already now managed to sacrifice all animal instincts and selfish needs to highly-spiritual and highly-intellectual transformations, which are continuously carried out in the focus dynamics of one’s own Self-Consciousness, are creators of the most favorable variants of the “future”. Any Conceptions of possibility of your participation in corruption, aggressive, terrorist, national-chauvinistic and racist, religious-fanatical and other destructive realisations become absolutely insurmountable for your further refocusing to more qualitative conditions of Existence, as CΦYYPMM-Forms of such low-frequency Levels are completely absent in focus dynamics of humans of more harmonious groups of Continuums. As the saying goes, « you snooze - you lose » ...

15.17865. Now, as regards the formulated question itself: «What features a human, capable to form surrounding reality of this wonderful future by means of dynamics of his own Self-Consciousness, will have»? For a start, all your “present” abilities are completely conditional on that all Creative Activity of gene structures of your DNA and principles of functioning of brain bio-Creators are entirely oriented to possibilities of the highest possible realisation in 3-4-dimensional Form-Systems of Worlds of only those creative tendencies and aspirations, generally overwhelming activity in Self-Consciousness of which defines you as not-Humans as yet. You are only potential Humans.

15.17866. What does it mean? A lot of humans think that all of us already became Humans. Just try to understand that you will become Humans only when you will no longer represent a tool of your lowest Form-Creators creativity that realize themselves through Levels of two lowest Centers. And for this purpose it is necessary to stop think about sex as of the most desired pleasure and the higher

delight, it is necessary to stop to hate someone or to be jealous, to envy, to use hypocrisy and lie in relations with each other. Until you are not realised sufficiently in all that, you are not Humans. Until you do not learn to be focused constantly in Levels of АИГЛЛИЛЛИАА- and ОРЛААКТОР-Ииссииди and will not have any interests in even the higher ИНГЛИМИЛИССА- and АРГЛЛААМУНИ-Ииссииди Levels any more, you do not become Humans.

15.17867. Frequency ННААССММ parameters of biological analogues of НУУ-ВВУ-Form-Types nowadays focused by you are meant only for the maximum degree of interqualitative Synthesis between different-qualitative Form-Creators of low - and mid-frequency Levels of Energy-Plasma. Though, it is necessary to notice that Form-Creators supervising focus dynamics of bio-Creators of 5-7th synthetic Levels of two lowest ИИССИИДИ-Centers are focused in biological and “bioplasmic” Forms of Self-Consciousnesses as well, but focused by them Continuums are incommensurably more qualitative and harmonious, than the reality nowadays surrounding you. All problem of focus dynamics carried out by you lay in a so far very weak synthesis in energy-information structures of your Self-Consciousnesses of interrelations between Form-Creators of four most lowest Levels of the first pair of Centers. Exactly this does not allow you to be guided by the prospects of the “future”, which are not associated with possibilities of realisation of your essential animal instincts, actively imposed and stimulated by means of various protoform bio-Creators.

15.17868. Those types of psycho-mental activity, which the majority of «so far not-humans» represent now in the present groups of Continuums, is not even a poor excuse for that, what Human race is fated to become, but is only an outwardly “humanized” variant of manifestation of Self-Consciousnesses, sublimated in themselves characteristic signs of lots of Proto-Forms. Until in the lowest Levels of Self-Consciousnesses full-fledged and deep Synthesis between dominant and background Form-Creators will not be carried out, it is possible only to dream of favorable prospects of development. And only when it will occur, Form-Creators of НУУ-ВВУ-Forms focused by you naturally will appear on such Levels of the Creativity, which greatest minds of present “humankind” even in the most courageous and optimistic forecasts are not able to imagine.

15.17869. Firstly, principles and ways of psychomental activity of the “future” more qualitative НУУ-ВВУ-Form-Types will depend on biological conditions to a lesser and lesser degree, when they will be stabilized in high-frequency levels of electromagnetic fluctuations, therefore a picture of genetic activity of a DNA will essentially change as well: in the human DNA additional pair of chromosomes will appear at the expense of significant growth in synthetic amino acids. As result of these mass mutagenic processes, nervous, vegetative, hematopoietic, urogenital, digestive, endocrine and respiratory systems will essentially change in biological systems of your “future” Forms of Self-Consciousnesses. With time it will lead to the fact that activity of a majority of bio-Creators of DNA will in a greater degree be shifted from a spectrum of coarse-waved - low- and mid-frequency - Levels to photon types of energy-information interrelations, when biochemical reactions will lose the nowadays defining role.

15.17870. Secondly, more deeply synthesized (in accordance to Илууввумиc Dominants) properties of the Energy-Plasma itself will allow humans much more widely, faster and more qualitatively to handle it in all directions of individual life creativity, exactly which will become the basic mechanism of your self-expression in the World around, i.e. Continuums will turn into much more active Forms of your creative self-expression. Energy-information interrelations with self-conscious Elements structuring Levels of a Form-Matter, will lose their “present” actuality, as it will be no need in them

anymore. To replace them, Form-Plasma will begin to provide all “material” basis of your “future” Creativity, and that is the main reason for mass manifestation of abilities to clairvoyance, telepathy, telekinesis, levitation, teleportation and that sort of things.

15.17871. I Repeat: the defining factor for Self-Consciousness refocusing by means of the shortest Vectors to Realities, where all this already exist, is deep mastering and active use of IISSIIDIOLOGY СФУУРММ-Forms in the life creativity. By means of intensively cultivating in one’s own Self-Consciousness universal Conceptions of this Knowledge and Principles of Immortality stated in it, you already “now” gradually turn into peculiar “hybrids” of your “present” and “future” Forms of Self-Consciousnesses, as if partially already representing in subjective «here and now» some features of focus dynamics of those your “personality” Interpretations, which soon will succeed present “humankind”. But it is possible to refocus inertially to the same Goal in other ways as well: by means of lots of unconscious trials, errors, chaotic and instinctive choices, for many thousands years gradually synthesizing a missing Experience in lots of “time loops» and, eventually, inevitably being convinced that the most sophisticated ways of selfish realizations are not able to take place of that creative joy, delight and gratification, which states of highly-developed Intelligence and Altruism give humans.

15.17872. Less and less perfect Forms of your Self-Consciousnesses will remain in the Form-Systems of the Worlds, that replenish inertially a relative time category Memories-of-the-Past, a synthesized Experience of which you use in your more qualitative creativity. Synthesis of the Qualities ALL-Love-ALL-Wisdom, ALL-Will-of-ALL-Intelligence and ALL-Unity will gradually become defining in your life creativity. Actually you will break all types of energy-information interrelations with Form-Creators of average and more high Levels of ИНГЛИМИЛИССА- and АРГЛЛААМУНИ-Iissiidi after stabilization in the second-third synthetic Levels of АИГЛЛИЛЛИАА- and ОРЛААКТОР-Iissiidi.

*When you started to tell about the new Worlds and technologies of our possible nearest “future”, about what might the future hold in store for us, there was a sensation of the powerful optimism, some extraordinary joy, there was a strong enthusiasm and desire to do the most altruistic choices henceforth to refocus only in these Worlds, instead of in any dramatic scenarios.*

15.17873. - The Enthusiasm arises, because you thought earlier, that all these possibilities exist somewhere very-very far from you, in some incomprehensible and unattainable dimensions. Neither of you did not know and did not imagine that it is possible to refocus “there” in reality only by means of steady increase of creative manifestations of one’s own Self-Consciousness. It turns out that all of us had and have the possibility to be conscious participants of those groups of Continuums, where Form-Systems of the Worlds are already not in aggression, egoism and hatred, but in conditions of the all-consuming Love, the high Intellect and the absolute Altruism initially generated by us. Since an active manifestation in Collective Self-Consciousness of the “humankind” of the СФУУР-ММ-Forms of IISSIIDIOLOGY, as far as tens and hundreds millions “humans” more and more deep and extensive study and master them, each of you will have a real chance to begin consciously to refocus to groups of Continuums of Iluuvvumic Directions, which are the most favourable and perspective for ours with yours further Existence.

15.17874. When focus of Creative Activity stays in Levels of high mentality and high sensuality it automatically involves more and more steady and qualitative display of abilities to a prediction of possible variants of “future”, to Intuition development, clairvoyant and to manipulation with SFUURMM-FORMS of high-quality Ideas. The method also consists in it sub-chakram refocusing: intuitively realising in subjective «here and now» a part of that in parallel with it and in all completeness it is already actively shown in any of more favorable “future” scenarios, you automatically stabilise focal dynamics of the Consciousness in those Levels of psychomental creativity which structure “the future” groups of Continuums.

15.17875. IISSIDIOLGY lets real possibility know what to be altruistic it is very favourable first of all that who cultivates similar tendencies in the Consciousness. Earlier “people” did not understand, why so it is necessary to be good to all who surrounds you, and in particular - to the enemies and foes. Very long all world religions promised to all “righteous persons” that making good on the earth, they will get once in «paradise in heavens». But such explanation is not perceived for a long time already by modern formed “people”. Before occurrence of the IISSIDIOLGY no one could convincingly, intelligibly and logically understandably answer this complicated question, which was caused by misunderstanding of that, for what reason is it necessary to help even to those once, who you do not know or, probably, never will see? New iissidiological Representations accurately answer it: thanks to stably shown by you Altruism will continuously raise the quality of your Existence due to that you purposefully refocus to more and more favorable conditions for realization of the further life creativity. Understanding of it is enough to convince any of you if and not to act altruistically, then to stop consciously to make harm.

15.17876. We have already started to study actively most rough of Aspects of Quality EVERYTHING, therefore in high-frequency Levels of Collective Consciousness of given “mankind” is shown NUU-VVU-FORMS which already consciously aspire to Unity with Everything more and more, intuitively developing this Aspiration through SFUURMM-FORMS different protoform - peri-lluuvvumic - Directions. Such concepts as Responsibility, Tolerance, Mercy, Sympathy and others, reflecting specificity of Creative Activity of Formo-creators of this Quality, represent harmoniously composed parts uoldmiizma (high-feeling Intelligence) and stoollmiizma (high-intellectual Altruism) which are synthesized By us in the lluuvvumic development Direction. Any of inhuman civilizations, having reached certain stages of development, also start to show intuitively Aspirations to Unity with Everything though they have approached to these creative tendencies at all how we, synthesising in the Consciousness Aspects of other dominant combinations (instead of ALL-Love–ALL-Wisdom and ALL-Knowledge-ALL-Informedness). On the basis of SFUURMM-FORMS of it, the general for set of civilizations, Qualities in “future” people can carry out contacts to other advanced Forms of Self-Consciousnesses. About when and how all it will be carried out, we will talk in the following our conversations.
